Violent Borders

Reece Jones,2016-10-11 Forty thousand people died trying to cross international borders in the past decade with the high profile deaths along the shores of Europe only accounting for half of the grisly total Reece Jones argues that these deaths are not

exceptional but rather the result of state attempts to contain populations and control access to resources and opportunities. We may live in an era of globalization, he writes, but much of the world is increasingly focused on limiting the free movement of people. In *Violent Borders*, Jones crosses the migrant trails of the world, documenting the billions of dollars spent on border security projects and their dire consequences for countless millions. While the poor are restricted by the lottery of birth to slum dwellings in the aftershocks of decolonization, the wealthy travel without constraint, exploiting pools of cheap labor and lax environmental regulations. With the growth of borders and resource enclosures, the deaths of migrants in search of a better life are intimately connected to climate change, environmental degradation, and the growth of global wealth inequality.

The Case for Open Borders John Washington, 2024-02-06. A beautifully written, broadly accessible, and forthright argument for a solution to the migration crisis: open the gates. Because of restrictive borders, human beings suffer and die. Closed borders force migrants seeking safety and dignity to journey across seas, trudge through deserts, and clamber over barbed wire. In the last five years alone, at least 60,000 people have died or gone missing while attempting to cross a border. As we deny, cast out, and crack down, we have stripped borders of their creative potential as lines of contact, catalyst, and blend, turning our thresholds into barricades. Brilliant and provocative, *The Case for Open Borders* deflates the mythology of national security through border lockdowns. By revisiting their historical origins, it counters the conspiracies of immigration's economic consequences; it urgently considers the challenges of climate change beyond the boundaries of narrow national identities. This book grounds its argument in the experiences and thinking of those on the frontlines of the crisis, spanning the world to do so. In each chapter, through detailed reporting, journalist and translator John Washington profiles a character impacted by borders. He adds to those portraits provocative analyses of the economics and ethics of bordering, concluding that if we are to seek justice or sustainability, we must fight for open borders. In recent years, important thinkers have begun to urge a profoundly different approach to migration, but no book has made the argument as accessible or as compelling. Washington's case shines with the multitudinous voices of people on the move, a portrait in miniature of what a world with open borders will give to our common future.

Against Borders Luke de Noronha, Gracie Mae Bradley, 2022-07-19. Borders harm all of us; they must be abolished. Borders divide workers and families, fuel racial division, and reinforce global disparities. They encourage the expansion of technologies of surveillance and control, which impact migrants and citizens both. Bradley and de Noronha tell what should by now be a simple truth: borders are not only at the edges of national territory, in airports or at border walls. Borders are everyday and everywhere; they follow people around and get between us and disrupt our collective safety, freedom, and flourishing. This is a passionate manifesto for border abolition, arguing that we must transform society and our relationships to one another and build a world in which everyone has the freedom to move and to stay.

Migration Borders Freedom Harald Bauder, 2016-09-01. International borders have become deadly barriers of a proportion rivaled only by war or natural disaster. Yet despite the damage created by borders, most people can't or don't want

to imagine a world without them What alternatives do we have to prevent the deadly results of contemporary borders In today s world national citizenship determines a person s ability to migrate across borders Migration Borders Freedom questions that premise Recognizing the magnitude of deaths occurring at contemporary borders worldwide the book problematizes the concept of the border and develops arguments for open borders and a world without borders It explores alternative possibilities ranging from the practical to the utopian that link migration with ideas of community citizenship and belonging The author calls into question the conventional political imagination that assumes migration and citizenship to be responsibilities of nation states rather than cities While the book draws on the theoretical work of thinkers such as Ernst Bloch David Harvey and Henry Lefebvre it also presents international empirical examples of policies and practices on migration and claims of belonging In this way the book equips the reader with the practical and conceptual tools for political action activist practice and scholarly engagement to achieve greater justice for people who are on the move The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781315638300> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Open Borders, 2020-12-15 The term open borders refers to a policy of allowing free movement between countries without restrictions or border control In an era characterized by the Brexit referendum and the Trump administration s policy of restricting immigration in the U S the prospect of borders being open may seem improbable A number of politicians policymakers economists and citizens assert that referendums and restrictions are the best way to address the economic and social issues that the international community faces today This volume helps readers examine the issue of open borders from a variety of angles examining its economic social political moral and legal aspects

Bordering and Governmentality Around the Greek Islands Aila Spathopoulou, 2023-01-01 This book focuses on processes of bordering and governmentality around the Greek border islands from the declaration of a refugee crisis in the summer of 2015 up until the emergence of the Covid 19 pandemic in 2020 The chapters trace the implementation of the EU migration hotspot approach across space and time from the maritime Aegean border to the islands Lesbos and Samos and from the islands to the Greek mainland They do so through the lenses of peoples refusal to succumb to categories that get reified as identities through the hotspot approach such as that of the deserving refugee the undeserving economic migrant the translator the volunteer the tourist and the researcher This book explores how migration management in Greece from 2015-2020 along with the reshaping of space and time reconfigured peoples relationships with one another and ultimately with one s self

Viapolitics William Walters, Charles Heller, Lorenzo Pezzani, 2021-11-15 Vehicles their infrastructures and the environments they traverse are fundamental to the movement of migrants and states attempts to govern them This volume s contributors use the concept of viapolitics to name and foreground this contested entanglement and examine the politics of migration and bordering across a range of sites They show how these elements constitute a key site of knowledge and struggle in migratory processes and offer a privileged

vantage point from which to interrogate practices of mobility and systems of control in their deeper histories and wider geographic connections This transdisciplinary group of scholars explores a set of empirically rich and diverse cases from the Spanish and European authorities attempts to control migrants entire trajectories to infrastructures of escort of Indonesian labor migrants from deportation train cars in the 1920s United States to contemporary stowaways at sea from illegalized migrants walking across treacherous Alpine mountain passes to aerial geographies of deportation Throughout Viapolitics interrogates anew the phenomenon called migration questioning how different forms of contentious mobility are experienced policed and contested Contributors Ethan Blue Maribel Casas Cortes Julie Y Chu Sebastian Cobarrubias Glenda Garelli Charles Heller Sabine Hess Bernd Kasperek Clara Lecadet Johan Lindquist Renisa Mawani Lorenzo Pezzani Ranabir Samaddar Amaha Senu Martina Tazzioli William Walters Open Borders Reece Jones,2019 Border control continues to be a highly contested and politically charged subject around the world This collection of essays challenges reactionary nationalism by making the positive case for the benefits of free movement for countries on both ends of the exchange Open Borders counters the knee jerk reaction to build walls and close borders by arguing that there is not a moral legal philosophical or economic case for limiting the movement of human beings at borders The volume brings together essays by theorists in anthropology geography international relations and other fields who argue for open borders with writings by activists who are working to make safe passage a reality on the ground It puts forward a clear concise and convincing case for a world without movement restrictions at borders The essays in the first part of the volume make a theoretical case for free movement by analyzing philosophical legal and moral arguments for opening borders In doing so they articulate a sustained critique of the dominant idea that states should favor the rights of their own citizens over the rights of all human beings The second part sketches out the current situation in the European Union in states that have erected border walls in states that have adopted a policy of inclusion such as Germany and Uganda and elsewhere in the world to demonstrate the consequences of the current regime of movement restrictions at borders The third part creates a dialogue between theorists and activists examining the work of Calais Migrant Solidarity No Borders Morocco activists in sanctuary cities and others who contest border restrictions on the ground No Borders Natasha King,2016-10-15 From the streets of Calais to the borders of Melilla Evros and the United States the slogan No borders is a thread connecting a multitude of different struggles for the freedom to move and to stay But what does it mean to make this slogan a reality Drawing on the author s extensive research in Greece and Calais as well as a decade campaigning for migrant rights Natasha King explores the different forms of activism that have emerged in the struggle against border controls and the dilemmas these activists face in translating their principles into practice Wide ranging and interdisciplinary No Borders constitutes vital reading for anyone interested in how we make radical alternatives to the state a genuine possibility for our times and raises crucial questions on the nature of resistance *African Borders, Conflict, Regional and Continental Integration* Innocent Moyo,Christopher

Changwe Nshimbi,2019-04-25 This book looks at the ways African borders impact war and conflict as well as the ways continental integration could contribute towards cooperation peace and well being in Africa African borders or borderlands can be a source of problems and opportunity There is often a historical geospatial and geopolitical architecture rooted in trajectories of war conflict and instability which could be transformed into those of peace regional and continental integration and development An example is the cross border and regional response to the Boko Haram insurgency in West Africa This book engages with cross border forms of cooperation and opportunity in Africa It considers initiatives and innovations which can be put in place or are already being employed on the ground within the current regional and continental integration projects Another important element is that of cross border informality which similarly provides a ready resource that if properly harnessed and regulated could unleash the development potential of African borders and borderlands Students and scholars within Geography International Relations and Border Studies will find this book useful It will also benefit civil society practitioners policymakers and activists in the NGO sector interested in issues such as migration social cohesion citizenship and local development

Borders and Migration Michael J. Carpenter,Melissa Kelly,Oliver Schmidtke,2023-01-10 Since 2015 the cross border movement of migrants and refugees has reached unprecedented levels War persecution destitution and desertification impelled millions to flee their homes in central Asia the Levant and North Africa The responses in the Global North varied country by country with some opening their borders to historically large numbers of refugees and asylum seekers while others adopted increasingly strict border policies The dramatic increase in global migration has triggered controversial political and scholarly debates The governance of cross

border mobility constitutes one of the key policy conundrums of the 21st century raising fundamental questions about human rights state responsibility and security The research literatures on borders and migration have rapidly expanded to meet the increased urgency of record numbers of displaced people Yet border studies have conventionally paid little attention to flows of people and migration studies have simultaneously underappreciated the changing nature of borders Borders and Migration The Canadian Experience in Comparative Perspective provides new insights into how migration is affected by border governance and vice versa Starting from the Canadian experience and with an emphasis on refugees and irregular migrants this multidisciplinary book explores how various levels of governance have facilitated and restricted flows of people across international borders The book sheds light on the changing governance of migration and borders Comparisons between Canada and other parts of the world bring into relief contemporary trends and challenges Available formats hardcover trade paperback accessible PDF and accessible ePub

Towards a Refugee Oriented Right of Asylum Laura Westra, Satvinder Juss, 2016-03-09 This volume explores the factors that give rise to the number of people seeking asylum and examines the barriers they currently and will continue to face Divided into three parts the authors first explore the causality that generates displacement examining climate change illegal conflicts and the deprivation of natural resources They argue that all of these problems either originate from human agency directly or are strongly influenced by human activities particularly those of wealthy countries in the North West The study goes on to discuss how migrants are received and the problems they face on arrival and concludes with confronting the fate and the status of asylum seekers after arrival and the walls both virtual and material that they encounter The authors propose ways of approaching the situation beyond the present language and the limited interpretations of the Convention on the Status of Refugees Written by leading experts in environmental ethics asylum law and international law the book will be essential
