Une Autre Existence La Condition Animale:

Une autre existence Florence Burgat, 2011-12-04 Il faut modifier radicalement notre façon de parler des animaux et reconnaître l'vidence de la condition animale ne plus penser uniquement par rapport à l'être humain ou par rapport à la nature Pour cela l'auteur propose un parcours critique travers les philosophies qui ont pensé l'animal Florence Burgat montre comment l'existentialisme Sartre et Levinas notamment plus encore peut être que la philosophie classique a liquidé et interdit la question de l'animal Elle explicite ces positions en développant le thème de l'organisme non plus en tant que machine mais organisation et démontre que le sens biologique est autre chose que l'ensemble des parties d'un animal et qu'il fonde cette conscience animale dans l'angoisse dont les animaux sont atteints Elle questionne la condition animale et s'interroge sur la subjectivité des animaux mettant en évidence leur pensée leur résistance avant d'attaquer les traitements inhumains et indifférents qui leur sont souvent réservés dont elle dénonce l'idologie sous-jacente Enfin avec l'vidence de la pratique de l'art chez les animaux l'auteur propose une réflexion sur le symbolique et sur la capacité symboliser montrant pour conclure que les animaux sont sujets d'une vie Une invitation à passer le cadre de la compassion pour fonder notre changement d'attitude sur la base d'une phénoménologie de l'existence animale ce qui a des conséquences galement sur notre façon d'appréhender la vie humaine

French Thinking about Animals Louisa Mackenzie, Stephanie Posthumus, 2015-04-01 Bringing together leading scholars from Belgium Canada France and the United States *French Thinking about Animals* makes available for the first time to an Anglophone readership a rich variety of interdisciplinary approaches to the animal question in France While the work of French thinkers such as Jacques Derrida Gilles Deleuze and Felix Guattari has been available in English for many years *French Thinking about Animals* opens up a much broader cross cultural dialogue within animal studies These original essays many of which have been translated especially for this volume draw on anthropology ethology geography history legal studies phenomenology and philosophy to interrogate human animal relationships They explore the many ways in which animals signify in French history society and intellectual history illustrating the exciting new perspectives being developed about the animal question in the French speaking world today Built on the strength and diversity of these contributions *French Thinking about Animals* demonstrates the interdisciplinary and internationalism that are needed if we hope to transform the interactions of humans and nonhuman animals in contemporary society

Animal Biographies Éric Baratay, 2022-08-15 **A Plea for the Animals** Matthieu Ricard, 2016-10-04 A powerful and wide ranging indictment of the treatment of animals by humans and an eloquent plea for animal rights Every cow just wants to be happy Every chicken just wants to be free Every bear dog or mouse experiences sorrow and feels pain as intensely as any of us humans do In a compelling appeal to reason and human kindness Matthieu Ricard here takes the arguments from his best sellers *Altruism* and *Happiness* to their logical conclusion that compassion toward all beings including our fellow animals is a moral obligation and the direction toward which any enlightened society must aspire He chronicles the appalling sufferings of the

animals we eat wear and use for adornment or entertainment and submits every traditional justification for their exploitation to scientific evidence and moral scrutiny What arises is an unambiguous and powerful ethical imperative for treating all of the animals with whom we share this planet with respect and compassion *Dwellings of Enchantment* Bénédicte Meillon,2020-10-27 *Dwellings of Enchantment* Writing and Reenchanting the Earth offers ecocritical and ecopoetic readings that focus on multispecies dwellings of enchantment and reenchant our rapport with the more than human world It sheds light on the marvelous entanglements between humans and other life forms coexisting with us entanglements that when fully perceived call onto humans to shift perspectives on both the causes and solutions to current ecological crises Working against the disenchantment of humans relationships with and perceptions of the world entailed by a modern ontology this book illustrates the power of ecopoetics to attune humans to the vibrant matter both within and outside of us Braiding indigenous with non indigenous worldviews this book tackles ecopoetics emerging from varying locations in the world It underscores the postmodernist remythologizing processes going on in many ecopoetic texts via magical realist modes and mythopoeia **Outside the Anthropological Machine** Chiara Mengozzi,2020-05-14 In the midst of the climate crisis and the threat of the sixth extinction we can no longer claim to be the masters of nature Rather we need to unlearn our species arrogance for the sake of all animals human and non human Rethinking our being in the world as Homo sapiens this monograph argues starts precisely from the way we relate to our closer companion species The authors gathered here endeavour to find multiple exit strategies from the anthropocentric paradigms that have bound the human and social sciences Part I investigates the unexplored margins of human history by re reading historical events literary texts and scientific findings from an animal s perspective rather than a human s Part II explores different forms of human animal relationships putting the emphasis on the institutions spaces and discourses that frame our interactions with animals Part III engages with processes of translation that aim to render animals experience and perception into human words and visual language *Bestiarius* Mariaelisa Dimino,Alessia Polatti,Roberta Zaroni,2018-10-25T00:00:00+02:00 The human animal relationship has always been characterized by a wide net of interactions and exchanges By providing an overview of the concept of animality and of the several meanings attached to it this book aims at rethinking the real nature of this notion towards a new definition of both the human and the animal The authors highlight the need to overcome the traditional tendency to read the animal merely as a symbol a metaphor or an allegory whose only purpose is that of representing and negotiating human power relations of race class and gender Within this context the edited collection *Bestiarius* intends to contribute to the present debate on Animal Studies by focusing on literary texts and discursive practices which reveal the epistemological and cultural dynamics that structure the very representation of the animal *Inquiring into Animal Enhancement* Simone Bateman,Sylvie Allouche,Jean Gayon,Michela Marzano,Jérôme Goffette,2015-08-30 This book explores issues raised by past and present practices of animal enhancement in terms of their means and their goals clarifies

conceptual issues and identifies lessons that can be learned about enhancement practices as they concern both animals and humans

The Ungraspable as a Philosophical Problem Alžbeta Kuchtová, 2024-08-19 The Ungraspable as a Philosophical Problem provides an analysis of the ungraspable of that which cannot be grasped by the mind or the senses When referring to the ungraspable in sensible reality we often speak of the untouchable the invisible the inaudible and the untastable In the abstract realm we speak of the non conceptual the ineffable the unsayable These are the modalities of the ungraspable that are explored in this study They have been considered absolute by some thinkers a claim that I critically assess My central claim is that the absoluteness of these modalities is linked to a desire to grasp which is characterized by the desire for exactitude for the proper and for domination First I examine the role of the hand in phenomenology more precisely in Martin Heidegger's philosophy in order to further define the notion of the ungraspable I then analyze Emmanuel Levinas's early works which offer an account of the ungraspability of nature the there is I then turn to Jacques Derrida who has proved that otherness is not only human but also animal and theoretical but who devotes little space to the otherness of the more than human or inorganic objects Finally I examine the otherness of so called inorganic or more than living objects natural objects and artifacts demonstrating its importance to our current situation

Animots Matthew Senior, David L. Clark, Carla Freccero, 2015-01-01 The latest volume of Yale French Studies addresses French inspired theoretical and philosophical concerns centered on animals and animality Contributors from France the United Kingdom and North America discuss animal related topics in the French philosophical and literary tradition offering a wide range of perspectives on animals ethics and the future of animal studies Essays question the reducibility of animal lives to rights discourse on the one hand and scientific empiricisms on the other and examine whether and how the advent of the posthuman will affect the standing and the future of the nonhuman animal

Capture Antoine Traisnel, 2020-09-29 Reading canonical works of the nineteenth century through the modern transformation of human animal relations From Audubon's still life watercolors to Muybridge's trip wire locomotion studies from Melville's epic chases to Poe's detective hunts the nineteenth century witnessed a surge of artistic literary and scientific treatments that sought to capture the truth of animals at the historical moment when animals were receding from everyday view In Capture Antoine Traisnel reveals how the drive to contain and record disappearing animals was a central feature and organizing pursuit of the nineteenth century U S cultural canon Capture offers a critical genealogy of the dominant representation of animals as elusive precarious and endangered that came to circulate widely in the nineteenth century Traisnel argues that capture is deeply continuous with the projects of white settler colonialism and the biocapitalist management of nonhuman and human populations demonstrating that the desire to capture animals in representation responded to and normalized the systemic disappearance of animals effected by unprecedented changes in the land the rise of mass slaughter and the new awareness of species extinction Tracking the prototyping of biopolitical governance and capitalist modes of control Traisnel theorizes capture as a regime of vision by which animals came to be seen

over the course of the nineteenth century as at once unknowable and yet understood in advance a frame by which we continue to encounter animals today

Les 9 aspects exclusifs du règne de Dieu sur les Humains Matern PÉDOUE, 2019-01-18 La diversité des disciplines de ce livre laisse croire que nous partons de coq l'âne Non il n'en est rien Nous avons pour certaines de nos écrits antérieurs parlé de trois règnes Règne humain règne végétal Règne animal Chacun de ces règnes est caractérisé naturellement par une discipline exprimant une amplitude maximum d'un humain d'une science ou d'une activité dont le commun des mortels ne
