User-Innovation Viktor Braun, Cornelius

Herstatt, 2009-06-06 Economic growth is highly dependent on technological progress and innovation yet the sources from which these innovations originate are still largely misunderstood and untapped Recent research has demonstrated that users rather than manufacturers are often a critical source of innovation in numerous fields from extreme sports to medical devices to software This book systematically identifies the most important barriers to user innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal economic technological and societal barriers to user innovation for the first time and proposing alternative possibilities Through original research the author reveals the dynamics of user innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon From this analysis it becomes clear that user innovation has become more difficult over time and that the problem is now of how manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer driven activities Arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations the author explains how licenses can in certain situations be employed to help

users overcome some of the barriers to user innovation User Innovation Barriers to Democratization and IP Licensing is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come

Impacts of Global Change on the Hydrological Cycle in West and Northwest Africa Peter Speth,Michael Christoph,Bernd Diekkrüger,2010-08-12 Africa is highly vulnerable to the impacts of climate change In particular shortage of fresh water is expected to be the dominant water problem for West and Northwest Africa of the 21th century In order to solve present and

projected future problems concerning fresh water supply a highly interdisciplinary approach is used in the book Strategies are offered for a sustainable and future oriented water management Based on different scenarios a range of management options is suggested with the aid of Information Systems and Spatial Decision Support Systems for two river catchments in Northwest and West Africa the wadi Dr a in south eastern Morocco and the Ou m basin in Benin The selected catchments are representative in the sense what can be learnt from these catchments for other similar catchments *Routledge Handbook of Global Public Health in Asia* Siân M. Griffiths, Jin Ling Tang, Eng Kiong Yeoh, 2014-04-16 Global public health is of growing concern to most governments and populations nowhere more so than in Asia the world s largest and most populous continent Whilst major advances have been made in controlling infectious diseases through public health measures as well as clinical medical treatments the world now faces other challenges including ageing populations and the epidemic crisis of obesity and non communicable diseases New emerging infections continue to develop and the growing threats to health due to environmental pollution and climate change increase the need for resilience and sustainability These threats to health are global in nature and this Handbook will explore perspectives on current public health issues in South Southeast and East Asia informing global as well as regional debate Whilst many books cite Western examples of the development of global public health this Handbook brings together both Western and Eastern scholarship creating a new global public health perspective suitable to face modern challenges in promoting the population s health This Handbook is essential reading not only for students professionals and scholars of global public health and related fields but is also written to be accessible to those with a general interest in the health of Asia **Political Handbook of the World 2022-2023** Tom Lansford, Jorge Brown, 2023 With more in depth coverage of current political controversies than any other reference guide Political Handbook of the World 2022 2023 is the most authoritative source for finding complete facts and analysis on each countrys governmental and political makeup Asia-Pacific Population Journal ,2009 Reproductive Health and Gender Equality Guang-zhen Wang, 2016-04-08 Since the late 1990s approaches to women s reproductive health has shifted from a service based model to a human rights approach This approach associates reproductive health with freedom from discrimination and enjoyment of a satisfying and safe sex life and full access to information and services related to reproduction In spite of this shift and the global effort to promote women s reproductive health through the enhancement of human rights and gender equality progress has been very slow In this book the author fills a much needed empirical study of women s reproductive health The author assesses data from 137 developing countries or areas and challenges the prevailing bioscience and public health models by linking women s reproductive health to gender equality measures and development policies Discussion on abortion rights regional variations and reproductive health needs among refugees and internally displaced persons are also discussed This is a timely study which provides a theoretical and social policy basis for monitoring and improving women s reproductive health in developing countries This is particularly important in the light of insufficient research in the field and

a lack of analysis on the empirical and theoretical linkages between reproductive health and gender equality The book will be of interest to researchers professionals and students interested in women s health issues gender women s studies and human rights

Africa Tony Binns, Etienne Nel, Alan Dixon, 2012-01-11 For many Africa is regarded as a place of mystery and negative images where reports of natural disasters and civil strife dominate media attention with relatively little publicity given to any of the continent s more positive attributes Africa has at last begun to receive the depth of interest it has long deserved in the shape of debates about trade aid and debt the Make Poverty History campaign and the UK s Commission on Africa But behind the superficial media facade Africa is a diverse complex and dynamic place with a rich history and a colonial engagement that although short lived was fundamental in determining the long term future of the continent At the start of the second decade of the twenty first century when the world is engulfed in a major financial crisis Africa has the dubious distinction of being the world s poorest continent This book introduces and demystifies Africa s diversity and dynamism and considers how its peoples and environments have interacted through time and space The background and diversity of Africa s social cultural economic political and environmental systems is examined as well as key development issues which have affected Africa in the past and are likely to be significant in shaping the future of the continent These include the impact of HIV AIDS sources of conflict and post conflict reconstruction the state and governance the nature of African economies in a global context and future development trajectories *Africa Diversity and Development* is a refreshing interdisciplinary text which enhances understanding of the background to Africa s current

position and clarifies possible future scenarios It is richly illustrated throughout with diagrams and plates and contains a wealth of detailed case studies and current data
