*Hands-On Geometry* Christopher M. Freeman, 2021-09-09. Put compasses into your students' hands and behold the results. Hands On Geometry teaches students to draw accurate constructions of equilateral triangles, squares, and regular hexagons, octagons, and dodecagons; to construct kites and use their diagonals to construct altitudes, angle bisectors, perpendicular bisectors, and the inscribed and circumscribed circles of any triangle; to construct perpendicular lines and rectangles, parallel lines and parallelograms; and to construct a regular pentagon and a golden rectangle. Students will enjoy fulfilling high standards of precision with these hands-on activities. Hands On Geometry provides the background students need to become exceptionally well prepared for a formal geometry class. The book provides an easy way to differentiate instruction. Because the lessons are self-explanatory, students can proceed at their own pace and the finished constructions can be assessed at a glance. Grades 4-6.
