Dor,2024-02-28 StarCraft Blizzard Entertainment 1998 is a real time strategy video game placing the player in command of three extraterrestrial races fighting against each other for strategic control of resources terrain and power Simon Dor examines the game s unanticipated effect by delving into the history of the game and the two core competencies it encouraged decoding and foreseeing Although StarCraft was not designed as an e sport its role in developing foreseeing skills helped give rise to one of the earliest e sport communities in South Korea Apart from the game s clear landmark status StarCraft offers a unique insight into changes in gaming culture and more broadly the marketability and profit of previously niche areas of interest The book places StarCraft in the history of real time strategy games in the 1990s Dune II Command Conquer Age of Empires in terms of visual style narrative tropes and control It shows how design decisions technological infrastructures and a strong contribution from its gaming community through Battle net and its campaign editor were necessary conditions for the flexibility it needed to grow its success In exploring the fanatic clusters of competitive players who formed the first tournaments and professionalized gaming StarCraft shows that the game was key to the transition towards foreseeing play and essential to competitive gaming and e sports *Gaming Cultures and Place in Asia-Pacific*

Larissa Hjorth,Dean Chan,2009-06-24 This collection explores the politics of game play and its cultural context by focusing on the Asia Pacific region Drawing from micro ethnographic studies to macro political economy analysis of techno nationalisms and transcultural flows of cultural capital it provides an interdisciplinary model for thinking through the politics of gaming The Archives Aa. Vv.,2015-04-21T00:00:00+02:00 The digital age has witnessed the development of a new kind of archive immaterial living and moving largely user generated and conceived for managing a wide variety of audio visual materials besides traditional films and videos The first part of this anthology investigates the ways in which media

forms like web documentaries video art and digital art web series amateur productions and also mobile films can be stored and preserved within the new digital repositories The second part focuses on archival and preservation practices of the video game This approach understands the archive not simply as a memory box but as a fully contemporary practice that locates new media objects in the present and acknowledges their changing cultural and social configurations The democratic often immaterial living mobile nature of contemporary archives forces us to question whether or not the traditional notion of the archive still has a heuristic value Or if it would be perhaps better to reject any conventional idea of archive and embrace the notion of an archive
