The Vixen Star Book User Guide James Chen, Adam Chen, 2015-10-01 This book is for anyone who owns or is thinking of owning a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high-tech computer-driven Go To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

*The NexStar User's Guide* Michael Swanson, 2004-01-30 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this one that provides a complete, detailed guide to buying, using, and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners; there is a chapter on Astronomy Basics and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer-controlled go-to model, a 5-inch. More models appeared in quick succession and Celestron's new range made it one of the two dominant manufacturers of affordable go-to telescopes.
