California Air Resources Board California. Air Resources Board,1989 **Understanding and Analysis: The California Air Resources Board Forest Offset Protocol** Eric Marland,Grant Domke,Jason Hoyle,Gregg Marland,Laurel Bates,Alex Helms,Benjamin Jones,Tamara Kowalczyk,Tatyana B. Ruseva,Celina Szymanski,2017-03-28 This book is a product of the initial phase of a broader study evaluating the voluntary and regulatory compliance protocols that are used to account for the contributions of forests in U S based greenhouse gas GHG mitigation programs The research presented here is particularly concerned with these protocols use of the USDA Forest Service s Forest Inventory and Analysis FIA data to describe forest conditions ownership and management scenarios and is oriented towards providing regulators and other interested parties with an objective comparison of the options uncertainties and opportunities available to offset GHG emissions through forest management Chapters focus on the protocols for recognizing forest carbon offsets in the California carbon cap and trade program as described in the Compliance Offset Protocol U S Forest Projects California Air Resources Board 2011 Readers will discover the protocols used for quantifying the offset of GHG emissions through forest related project activity As such its scope includes a review of the current methods used in voluntary and compliance forest protocols an evaluation of the metrics used to assign baselines and determine additionality in the forest offset protocols an examination of key quantitative and qualitative components and assumptions and a discussion of opportunities for modifying forest offset protocols in light of the rapidly changing GHG related policy and regulatory environment Finally the report also discusses accounting and policy issues that create potential barriers to participation in the California cap and trade program and overall programmatic additionality in addressing the needs of a mitigation strategy *California Air Quality* California. Air Pollution in California, Annual Report California. Air Resources Board,1974 **State and Federal Standards for Mobile-Source Emissions** National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on State Practices in Setting Mobile Source Emissions Standards,2006-06-15 Emissions from mobile sources contribute significantly to air pollution in the United States Such sources include cars and light and heavy duty trucks diesel powered cranes bulldozers and tractors and equipment such as lawnmowers that run on small gasoline engines The role of state versus federal government in establishing mobile source emissions standards is an important environmental management issue With this in mind Congress called on EPA to arrange an independent study of the practices and procedures by which California develops separate emissions standards from the federal government and other states choose to adopt the California standards The report provides an assessment of the scientific and technical procedures used by states to develop or adopt different emissions standards and a comparison of those policies and practices with those used by EPA It also considers the impacts of state emissions standards on various factors including compliance costs and emissions The report concludes that despite the substantial progress in reducing emissions from mobile sources nationwide

more needs to be done to attain federal air quality standards in many parts of the country. Additionally, California should continue its pioneering role in setting emissions standards for cars, trucks, and off-road equipment.

Introduction to Air in California David Carle, 2006. Before you take another breath, find out everything you need to know about what's in your air. David Carle has made California's most complicated environmental resource problem accessible and interesting. Mary D. Nichols, Director, UCLA Institute of the Environment. *Evaluating Vehicle Emissions Inspection and Maintenance Programs*. National Research Council, Transportation Research Board, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Vehicle Emission Inspection and Maintenance Programs, 2001-11-16. Emissions inspection and maintenance (I/M) programs subject vehicles to periodic inspections of their emission control systems. Despite widespread use of these programs in air quality management, policy makers and the public have found a number of problems associated with them. Prominent among these issues is the perception that emissions benefits and other impacts of I/M programs have not been evaluated adequately. *Evaluating Vehicle Emissions Inspection and Maintenance Programs* assesses the effectiveness of these programs for reducing mobile source emissions. In this report, the committee evaluates the differences in the characteristics of motor vehicle emissions in areas with and without I/M programs, identifies criteria and methodologies for their evaluation, and recommends improvements to the programs. Most useful of all, this book will help summarize the observed benefits of these programs and how they can be redirected in the future to increase their effectiveness.

Los Angeles National Forest (N.F.), Littlerock Dam and Reservoir Restoration Project, 1992. Equity in the Urban Built Environment Bradley Bereitschaft, 2024-12-30. This book explores inequities in the urban built environment across a diverse range of places and considers practical solutions and strategies aimed at building more just, inclusive, and sustainable cities. Achieving more equitable and prosperous urban places requires a critical examination of the design and layout of our cities. The 16 chapters of this book illuminate the ways in which the built environment, including buildings, roads, public spaces, and other infrastructure, shapes our health and prosperity through a complex set of physical and social interactions. It brings together experts from a variety of fields to identify and suggest workable solutions for inequities in the spatial distribution of amenities and disamenities and the processes and policies that give rise to these unjust patterns. Blending scholarly knowledge and practical experience, many of these strategies and solutions are presented through the lens of real-world case studies. One key takeaway is that the planning of our cities should be a communal effort that properly reflects the needs of all residents. Equity in the built environment can only be realized when people of diverse backgrounds, ethnicities, ages, and abilities feel welcome to both shape and enjoy the shared public realm. This book is intended for a wide audience that primarily includes scholars, students, and professionals in the fields of urban geography, urban planning, landscape architecture, and urban studies. Professionals in urban planning and policy with a desire to advance equity goals will likely appreciate the strategies, recommendations, and best practices discussed within.
