Andrew Carnegie: The Father of Middle-Class America

For decades Americans couldn't help but love the self-made, self-loving Laissez-Faire titan. The image of the little girl working so quietly that poverty is made possible keeps the poor in the 1990s, and her story continues to be a dream of what the future can really hold. The rags-to-riches phenomenon is the heart of the American Dream. And for other people have embodied the phenomenon as much as Andrew Carnegie did in the late 1800s and early 1900s. His example and industry moved him to become the father of middle-class America.

Andrew Carnegie can be looked to as an ideal example of a poor immigrant making his way up to become leader of the capitalist world. Carnegie was born into a poor working-class family in Scotland. According to the PBS documentary "The Father Who is the World: Andrew Carnegie," the Industrial Revolution was difficult on Carnegie's father, causing him to lose his working position. The Carnegie family was much opposed to the idea of a privileged class, who gained their wealth simply by inheritance ("Robert"). This type of upbringing played a large factor in Andrew Carnegie's destiny. In order to oppose his mother's desire for material wealth, and perhaps in an effort to live his father's words, Carnegie opposed poverty and showed no property.

Carnegie's character was ideal for getting wealth. His mother taught him to "look after the pennies, and the pounds will take care of themselves," he later turned the phrase into "work for cents, and the profits take care of themselves" ("Robert"). Look back was inspired by his father's words. He also believed that "all is well when all goes better" ("Robert"). His dream

Surviving Freshman Composition, 2007

Computer Utilization of Time-line Medical Data from Man in Space Flight Jefferson F. Lindsey, 1965 The NASA medical data program is designed to contribute to 1 the safety of the astronauts while in flight 2 the development of scientific products and 3 the standardization of in flight and ground based medical data so that they are in a standard and mutually interchangeable form for computer input and analysis A time line approach has been developed for accomplishing these purposes It involves preparing medical data both on magnetic tape and on consecutive data sheets for appropriate portions of all NASA manned space flights Each data sheet shows the physician all relevant information of interest for a specified time interval a 10 second interval during stressful periods such as exit and reentry and a one minute interval during weightlessness Data on each successive data sheet includes analog and digital indicators of astronaut beat to beat heart rate pulmonary ventilation and various spacecraft environmental as well as astronaut performance measures Identical types of data pertaining to each astronaut have been recorded for comparable time periods for each of the six manned Mercury space flights and the Gemini flights to date e.g. the periods of exit and reentry and periods when identical functions were being performed Selected ground based medical data also have been prepared in this manner An ultimate goal is to develop a standardized method to record and store on magnetic tape all useful medical data on a world wide basis for immediate retrieval in connection with the solution of medical problems to benefit mankind NASA has already taken the first step in this direction The NASA approach for space medicine data has been presented in this paper It can serve as a building block and is open for review criticism revision combination with other approaches or redirection These are some of the steps by which progress can be made toward the ultimate goal
