Noordhuizen, J. Cannas da

Silva, J.S.C. Boersema, A. Vieira, 2023-08-28 Quality is a keyword in animal production. Next to product quality, process quality has also become relevant for dairy farmers. Issues like food safety, public health, animal health, and welfare are determined by the conditions of the production process. To address these, the EU has issued the General Food Law 178/2002 and the Hygiene directives EC 853/2004 and EC 854/2004 dealing with the forenamed domains with the aim to protect consumers. The suggestion was also made by the EU that farmers apply a HACCP-like plan to meet these new quality demands. Key issues are structure, organisation, planning, formalisation, and demonstrability, which can also be found in the HACCP concept. This book addresses Quality Risk Management through applying the HACCP-like concept. First, the assessment of strong and weak points on a dairy farm are dealt with, which is useful for farm inspection and herd health programmes. Then, the 12 steps for developing a HACCP plan are followed through the various chapters. Many examples and elaborations are given. An example farm, FX, is introduced to show how the different elements may look in reality. At the end of the book, characteristics of entrepreneur-like dairy farmers are given and compared to strong and weak points of cattle practitioners. Practitioners may conclude how to better serve this type of farmer. Communication plays a paramount role. Finally, several general issues are addressed: economics, integrating classical herd health with quality risk management programmes. The aim of this book is to give practical guidelines and examples for dairy farmers, cattle practitioners, and extension people who desire to jointly develop and implement a HACCP-based quality risk management programme. This book is well written with many practical flow charts and Good Practice advice. I would recommend it to any veterinarian involved in producing risk management programs or Standard Operating Procedure type documents for dairy farms. The chapters on good communication and marketing would be useful for most veterinarians. David S. Beggs, book review editor, *The Australian Cattle Veterinarian*, Volume 50, p. 34-35, March 09.
