

# GEORGIA'S K-12 MATHEMATICS STANDARDS 2021

Georgia's many and diverse school leaders are committed to the best and to consistent outcomes for Georgia students — laying a strong foundation of mathematical proficiency, building upon and systematically expanding knowledge and content, providing instructional supports to meet our students' needs for success, ensuring that all students reach success, and leading regarding the use of mathematical knowledge and methods and applications for life. These Georgia school and Georgia system standards leverage the insight, expertise, experience, and efforts of thousands of Georgians to deliver the very best educational experience for Georgia's 1.7 million students.

In August 2019, Governor Brian Kemp and State Superintendent of Public Instruction Richard Shuster announced the review and revision of Georgia's K-12 mathematics standards. Georgia educators engaged throughout the standards review and revision process through school teams and working groups, in addition to education working groups across the state and the Georgia Parent Committee. Governor Kemp announced a new way for Georgians to provide input on the standards: the Citizens Review Committee, a group composed of students, parents, teachers and community leaders, and champion educators across the state. Together, these stakeholders understand students' experiences, have input in and built in the process and product.

The Citizens Review Committee provides a voice and recommendations to the working groups of educators who came together to make the standards, ensuring the revised content is usable and timely for Georgia students and school educators. Since May 2020, Georgia educators in the state's public schools from July through September 2020, providing additional feedback for educators to review. This process of revising the standards involved more than 200 mathematics educators — from beginning to experienced — representing all education levels, subject, and community across the state.

State educators in mathematics districts engaged in deep discussions, shared ideas and feedback, reflected on many single student, subject, and skill considerations and recommendations. To support mathematics teachers, they also developed teaching progressions for those who may struggle with some concepts and how they progressed writing, problem solving, problem solving, and defined and demonstrated appropriate expectations.

These teachers contributed strategies and methods for solving mathematical problems and developed standards — problem solvers — and solutions made within the past movement mathematics topics more. These recommendations have been shared with the Georgia Parent Committee, which is composed of parents, teachers, parents, experienced experts, and business leaders, it's not up to the Citizens Review Committee for Georgia's students and teachers.

Based on the recommendations of Georgia's schools, the State Board of Education will review and revise the K-12 mathematics standards for public schools. Following public comment, the standards will be implemented for school year 2021-22 as part of further review and professional learning time for implementation.

**New Destinations** Victor Zuniga,Ruben Hernandez-Leon,2005-04-07 Mexican immigration to the United States the  
oldest and largest immigration movement to this country is in the midst of a fundamental transformation For decades

Mexican immigration was primarily a border phenomenon confined to Southwestern states. But legal changes in the mid 1980s paved the way for Mexican migrants to settle in parts of America that had no previous exposure to people of Mexican heritage. In *New Destinations*, editors Victor Zúñiga and Rubén Hernández-León bring together an interdisciplinary team of scholars to examine demographic, social, cultural, and political changes in areas where the incorporation of Mexican migrants has deeply changed the preexisting ethnic landscape. *New Destinations* looks at several of the communities where Mexican migrants are beginning to settle and documents how the latest arrivals are reshaping and being reshaped by these new areas of settlement. Contributors Jorge Durand, Douglas Massey, and Chiara Capoferro use census data to diagram the historical evolution of Mexican immigration to the United States, noting the demographic, economic, and legal factors that led recent immigrants to move to areas where few of their predecessors had settled. Looking at two towns in Southern Louisiana, contributors Katharine Donato, Melissa Stainback, and Carl Bankston III reach a surprising conclusion: that documented immigrant workers did a poorer job of integrating into the local culture than their undocumented peers. They attribute this counterintuitive finding to documentation policies which helped intensify employer control over migrants and undercut the formation of a stable migrant community among documented workers. Brian Rich and Marta Miranda detail an ambivalent mixture of paternalism and xenophobia by local residents toward migrants in Lexington, Kentucky. The new arrivals were welcomed for their strong work ethic so long as they stayed in invisible spheres such as fieldwork but were resented once they began to take part in more public activities like schools or town meetings. *New Destinations* also provides some hopeful examples of progress in community relations. Several chapters, including Mark Grey and Anne Woodrick's examination of a small Iowa town, point to the importance of dialogue and mediation in establishing amicable relations between ethnic groups in newly multicultural settings. *New Destinations* is the first scholarly assessment of Mexican migrants' experience in the Midwest, Northeast, and deep South, the latest settlement points for America's largest immigrant group. Enriched by perspectives from demographers, anthropologists, sociologists, folklorists, and political scientists, this volume is an essential starting point for scholarship on the new Mexican migration.
