Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich

concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Media Diversity in South Africa Julie Reid, 2021-12-30 This timely book argues that the Global North's research methods and traditional assumptions are not valid to the media landscapes and audiences of the Global South With South Africa as the focus the authors offer a new understanding of media diversity along an audience centred approach Disappointingly research shows that most South African citizens most of whom are economically marginalised are found to experience extremely low levels of media content diversity in their personal media diets The contributing factors are inter related and complex but include the inequitable distribution of media content a lack of African language media and most especially the cost of media access which is unaffordable to many In this book the authors examine what went wrong with post apartheid attempts to democratise the media landscape and why the experienced levels of media diversity by the majority South African audience remain so woefully low While media diversity is usually measured by policymakers sector stakeholders or by market related imperatives this book foregrounds the perspective of the media consumer In doing so traditional media measuring is inverted leading to a more in depth understanding of how ordinary people in the Global South receive media content how much and why The authors offer a holistic analysis of the ineffectuality of key media policymaking processes projects and institutions while also suggesting how these could be transformed to create a more diverse and broadly accessible media landscape

 America South America Africa Europe and Asia Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university
 today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional
 classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary
 academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for
 effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans
 are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown
 domain of executive management with its related problems Deans nowadays are required to be more than collegial
 intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats
 Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of
 both the academe from which they emerge and the administration to whom they now need to account Their lack of
 preparation and inadequate support points to the need for a more strategic integrated approach to leadership development
