

Simple Probability Quiz

1. A middle school chess club has 5 members: Adam, Bradley, Carol, Davis, and Ella. Two students from the club will be selected at random to participate in the county chess tournament. What is the probability that Adam and Ella will be selected?

2. A high school science teacher has 70 students. Of those students, 35 are in the band and 32 are on a sports team. There are 18 students who are not in the band or on a sports team. One student from the 70 students will be selected at random. Let event A represent the event of selecting a student in the band, and let event B represent the event of selecting a student on a sports team.

Are A and B disjoint (mutually exclusive) events? Hint: A Venn Diagram might help.

3. Students at a local elementary school were shown a painting and asked which emotion—joy, happiness, love, or anger—they felt by looking at the painting. The students were classified by their age. The following table summarizes the responses of the students by age-group.

	Joy	Happiness	Love	Anger	Total
4 to 8 years	10	50	40	10	110
9 to 13 years	11	20	80	40	251
Total	21	70	120	50	361
