

Physics A Unit 6 Momentum Lab

Hypothesis: Create hypotheses of what you think the results of this experiment will be. Support your hypotheses with your knowledge of momentum.

- How will the momentum of the balls after the collision compare to the momentum before the collision?

The total momentum of the balls before the collision will equal the total momentum of the balls after the collision provided that the system is isolated. They will obey the law of conservation of momentum.

- What differences can you expect between inelastic and elastic collisions?

Elastic collisions- KE is conserved and so is momentum
The balls will bounce off of each other

Inelastic collisions- The balls will stick together
The final velocity of the balls will be the same
Momentum is conserved by KE is not conserved.

Procedure:

1. Open this link to access the simulation: <https://phet.colorado.edu/en/simulations/collision-lab>. Click "Play" and then choose "Intro".
2. On the screen you should see a pink and a blue ball. Below the balls is a "Mass" box. Click the "More Data" button above this box and you will be able to change the mass, velocity, and position of each ball.
