### case application

The Johnson family includes Marv (age 34), Gail (33), Andrew (8), and Molly (4). What are some investment goals that might be appropriate for this family? What types of investments might be used to achieve these goals?

*Common investment goals in this situation might be to create an emergency fund, to save for the children's college education, and to save for retirement. The Johnsons might start their saving-investing program with a savings account, money market account, or certificates of deposit. Next, they might consider an aggressive stock mutual fund that could give them good long-term growth for the education and retirement funds. All of those are easier to implement with an automatic withdrawal each month from a bank account to the savings account or the investment company.*
