Before You Begin

Battery Pack Installation and Removal

- To install the battery, hold the transmitter with your left hand so your palm is over the speaker and your thumb is on the top of the left clip. Insert the battery pack into the battery compartment on the back of the radio while sliding the Back-Clip outward, then slide the Battery Pack Latch until it locks in place with a "Click."

- To remove the battery, turn the radio off and remove any protection cover. Open the Battery Pack latch on the bottom of the radio, then slide the battery downward and out from the radio while holding the Back-Clip.

Caution!

Do not attempt to open one of the rechargeable Ni-Cd packs, as they could explode if accidentally short-circuited.

Low Battery Indication

- As the battery discharges during use, the voltage gradually becomes lower. When the battery voltage reaches 6.2 volts, indicate use a fully-charged battery and recharge the depleted pack. The **VBATT** indicator on the top of the radio with Mode red on the VX-180, the **CH** icon will appear on the LCD when the battery voltage is low.
- Avoid recharging Ni-Cd batteries often with fully-see batteries charged, as this can degrade the charge capacity. We recommend that you carry an extra, fully-charged pack with you so the operational battery may be used until depletion (the "sleep cycling" technique preserves better long-term battery capacity).

Preliminary Steps

- Insert a charged battery pack into the transmitter, as described previously.
- Insert the supplied antenna onto the antenna jack. Never attempt to operate this transmitter without an antenna connected.
- If you have a Speaker/Microphone, we recommend that it can be connected until you are familiar with the basic operation of the VX-160-180.

Operation Quick Start

- Turn the top panel's **VCL/PWR** knob clockwise to turn on the radio on.

- Turn the top panel's **CH** selector knob to choose the desired operating channel.

- Rotate the **VCL/PWR** knob to set the volume level. If no signal is present, press and hold the **MON/SP** key for more than 1 second; back-ground noise will now be heard, and you may use this to set the **VCL/PWR** knob for the desired audio level.

- Press and hold in the **MON/SP** key for more than 1 second to press the **MON/SP** key to open the noise and monitor channel (audio) monitoring.

- To transmit, press and hold in the **PTT** switch. Speak into the microphone area of the front panel grille (noise left-hand control is a normal voice level). To stop in the Receive mode, release the **PTT** switch.

- If a Speaker/Microphone is available, remove the plastic cap and its two connecting wires from the right side of the transmitter, then insert the plug into the Speaker/Microphone into the **MON/SP** jack; when the plug using the wires is supplied with the Speaker/Microphone, hold the speaker grille up so you can while receiving. To transmit, press the **PTT** switch on the Speaker/Microphone, just as you would on the main transmitter's body.

Never leave the original plastic cap and its connecting wires. They should be re-installed when not using the Speaker/Microphone.
