Schools Still Matters tells the story of the aftermath of the 2009 Wake County school board election in favor of neighborhood schools including the fierce public debate that ensued during school board meetings and in the pages of the local newspaper and the groundswell of community support that voted in a pro diversity school board in 2011 What was at stake in those years was the fundamental direction of the largest school district in North Carolina and the 14th largest in the U S Would it maintain a commitment to diverse schools and if so how would it balance that commitment with various competing interests and demands Through hundreds of published opinion articles and several in depth interviews with community leaders Wake examines the substance of that debate and explores the community s vision for public education **Handbook of Early**

Monitoring Educational Equity National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Board on Testing and Assessment,Committee on Developing Indicators of Educational Equity,2019-10-30 Disparities in educational attainment among population groups have characterized the United States throughout its history Education is sometimes characterized as the great equalizer but to date the country has not found ways to successfully address the adverse effects of socioeconomic circumstances prejudice and discrimination that suppress performance for some groups To ensure that the pursuit of equity encompasses both the goals to which the nation aspires for its children and the mechanisms to attain those goals a revised set of equity indicators is needed Measures of educational equity often fail to account for the impact of the circumstances in which students live on their academic engagement academic progress and educational attainment Some of the contextual factors that bear on learning include food and housing insecurity exposure to violence unsafe neighborhoods adverse childhood experiences and exposure to environmental toxins Consequently it is difficult to identify when intervention is necessary and how it should function A revised set of equity indicators should highlight disparities provide a way to explore potential causes and point toward possible improvements Monitoring Educational Equity proposes a system of indicators of educational equity and

presents recommendations for implementation This report also serves as a framework to help policy makers better understand and combat inequity in the United States education system Disparities in educational opportunities reinforce and often amplify disparities in outcomes throughout people s lives Thus it is critical to ensure that all students receive comprehensive supports that level the playing field in order to improve the well being of underrepresented individuals and the nation

Hope and Despair in the American City Gerald Grant,2011-03-04 In 1972 the U S Supreme Court handed down a 5 4 verdict in *Milliken v Bradley* thereby blocking the state of Michigan from merging the Detroit public school system with those of the surrounding suburbs This decision effectively walled off underprivileged students in many American cities condemning them to a system of racial and class segregation and destroying their chances of obtaining a decent education In *Hope and Despair in the American City* Gerald Grant compares two cities his hometown of Syracuse New York and Raleigh North Carolina in order to examine the consequences of the nation s ongoing educational inequities The school system in Syracuse is a slough of despair the one in Raleigh a beacon of hope Grant argues that the chief reason for Raleigh s educational success is the integration by social class that occurred when the city voluntarily merged with the surrounding suburbs in 1976 to create the Wake County Public School System By contrast the primary cause of Syracuse s decline has been the growing class and racial segregation of its metropolitan schools which has left the city mired in poverty

Hope and Despair in the American City is a compelling study of urban social policy that combines field research and historical narrative in lucid and engaging prose The result is an ambitious portrait sometimes disturbing often inspiring of two cities that exemplify our nation s greatest educational challenges as well as a passionate exploration of the potential for school reform that exists for our urban schools today

Schooled and Sorted Thurston Domina,Andrew M. Penner,Emily K. Penner,2023-06-22 We tend to view education primarily as a way to teach students skills and knowledge that they will draw upon as they move into their adult lives However schools do more than educate students they also place students into categories such as kindergartner English language learner or honor roll student In *Schooled Sorted* Thurston Domina Andrew M Penner and Emily K Penner explore processes of educational categorization in order to explain the complex relationship between education and social inequality and to identify strategies that can help build more just educational systems Some educational categories have broadly egalitarian consequences Indeed Domina Penner and Penner argue that when societies enroll young people in school making them students they mark them as individuals who are worthy of rights But other educational categories reinforce powerful social categories including race gender and class and ultimately reproduce social and economic inequality in society Elite colleges tracked high schools and elementary school gifted programs provide not only different educational experiences but also create merit and inequality by sorting students into categories that are defined by the students who are excluded *Schooled Sorted* highlights that many of the decisions that define educational categories occur in school based committee meetings and other relatively local settings The local nature

of these decisions provides many opportunities to define educational categories differently and for school communities to bring about change. *Schooled Sorted* is an illuminating investigation into the ways sorting within schools translates into inequality in the larger world. While some educational categorization may be unavoidable, the authors suggest ways to build a more equitable system and thus a more equitable society.

Dumbing Down America James R. Delisle, 2021-09-03 At a time when the U.S. education system consistently lags behind its international peers, *Dumbing Down America* shows exactly why America can't keep up by providing a critical look at the nation's schools through the eyes of the children whose minds are languishing in countless classrooms. Filled with specific examples of how gifted children are being shortchanged by a nation that believes smart kids will succeed on their own, *Dumbing Down America* packs a powerful message. If we want our nation to prosper, we must pay attention to its most intelligent youth. With more than 35 years of experience working with and for gifted children, author James R. Delisle provides a template of what can and must happen in America's schools if they are to fulfill their mission of educating every child to the fullest potential. *Dumbing Down America* is a must read for any individual who believes that the unfulfilled promises to gifted children must begin to be met in America's schools today, not someday.

Perspectives on Transitions in Schooling and Instructional Practice Susan E. Elliott-Johns, Daniel H. Jarvis, 2013-12-06 *Perspectives on Transitions in Schooling and Instructional Practice* examines student transitions between major levels of schooling, teacher transitions in instructional practice, and the intersection of these two significant themes in education research. Twenty-six leading international experts offer meaningful insights on current pedagogical practices, obstacles to effective transitions, and proven strategies for stakeholders involved in supporting students in transition. The book is divided into four sections representing the four main transitions in formal schooling: Early Years (Home, Pre-school, and Kindergarten) to Early Elementary (Grades 1-3), Early Elementary to Late Elementary (Grades 4-8), Late Elementary to Secondary (Grades 9-12), and Secondary to Post-Secondary (College and University). A coda draws together overarching themes from throughout the text to provide recommendations and a visual model that captures their interactions. Combining theoretical approaches with practical examples of school-based initiatives, this book will appeal to those involved in supporting either the student experience, both academically and emotionally, or teacher professional learning and growth.
