Unit 2: How Markets Work

Investigating Price Changes Portfolio Project

Part 1: Complete *The Wall Street Journal Classroom Edition*, Chapter 6 article "Prices" and answer questions 1–3. 5 points each.

Part 2:

Find two current events articles focusing on the issue of pricing.

You may choose to use online resources recommended by Prentice Hall's *Economics: Principles in Action*. To access current events articles, click on the Chapter Outlines for Chapters 4, 5, 6, or 7 and scroll down the page and click the Keep It Current Link to find articles from *The Wall Street Journal*.

If you use other online sources you may want to enter the keywords price, supply, demand, or market equilibrium to find appropriate articles.

You may use local or national newspapers or magazines. Articles need to be sufficient in length that you will have the background information needed to complete the cause and effect chart. You may need to make inferences regarding some of the effects of the price changes.

- One article must focus on a product whose price has increased.
- One article must focus on a product whose price has dropped.

1. For each article create a cause and effect graph or flow chart showing the cause(s) of the price change and the effect(s) of the changed price. 5 points per chart

Answers should be written in complete sentences. Each answer should include supporting details and explanations.

2. How will the change in prices affect demand for each product? 5 points
3. How will the change in prices affect the producers of each product? 5 points
4. For each product, has a market equilibrium been reached? Why or why not? 5 points

Krugman,Robin Wells,2009-02-28 Paul Krugman is one of the leading economic thinkers of our time The examples he uses in this book include international experiences so will appeal to a European audience and give students a more realistic view of how economics works in the real world **Gale Directory of Publications and Broadcast Media** ,2005 Identifies specific print and broadcast sources of news and advertising for trade business labor and professionals Arrangement is geographic with a thumbnail description of each local market Indexes are classified by format and subject matter and alphabetical by name and keyword Modern Principles of Economics Tyler Cowen,Alex Tabarrok,2009-10-09 From the authors See the Invisible Hand Understand Your World That s the tagline of Modern Principles and our teaching philosophy Nobel laureate Vernon Smith put it this way At the heart of economics is a scientific mystery a scientific mystery as deep fundamental and inspiring as that of the expanding universe or the forces that bind matter How is order produced from freedom of choice We want students to be inspired by this mystery and by how economists have begun to solve it Thus we show how markets interconnect and respond in surprising ways to changes in resources and preferences Consider for example how markets respond to a reduction in the supply of oil Of course the price of oil increases giving consumers an incentive to use less and suppliers an incentive to discover more But an increase in the price of oil also encourages Brazilian sugar cane farmers to devote more of their production to ethanol and less to sugar thereby driving up the price of sugar An increase in the price of sugar means a reduction in the quantity of candy demanded So one way the market responds to a reduction in the supply of oil is by encouraging consumers to eat less candy In analyses like this we teach students to see the invisible hand and in so

doing to understand their world Similarly we offer a unique and simple proof of the amazing invisible hand theorem that without any central direction competitive markets allocate production across firms in a way that minimizes aggregate costs To understand their world students must understand when self interest promotes the social interest and when it does not Thus Modern Principles has in depth analyses of externalities public goods and ethical issues with market incomes and trade Moreover we always discuss economic theory in the context of real world problems such as the decline of the ocean fisheries climate change and the shortage of human organs for transplant
