National Institutes of Health (U.S.). Division of Research Grants,1972 **Journal of Special Operations Medicine** ,2009 Up the Down Escalator Lisa Doggett,2023-08-15 A memoir of triumph in the face of a terrifying diagnosis Up the Down Escalator recounts Dr Lisa Doggett s startling shift from doctor to patient as she learns to live with multiple sclerosis while running a clinic for uninsured patients in central Austin Recounting before and after the discovery of her MS she chronicles vexing symptoms while trying to be an attentive mother wife and a caring family doctor 2024 Gold Winner Benjamin Franklin Awards Health to navigate chronic dizziness relapses and parenting frustrations and to push her physical limits as a runner to go farther than ever before As the director of a health clinic for the uninsured Doggett s MS inspires an even deeper empathy as she confronts challenging cases prompting her to work harder on behalf of those in her care many of whom struggle with illnesses more serious than her own This hopeful and uplifting book will encourage those living with chronic disease and those supporting them to power forward with courage and grace It will spark conversations to redefine perfect parenting and trigger uncomfortable discussions and outrage about the vicious inequalities of health care in the U S Most of all it will inspire readers to embrace the gifts of an imperfect life and look for silver linings despite life s detours that sabotage plans and take them off their expected paths *Closing the Gender Pay Gap in Medicine* Amy S. Gottlieb, MD, FACP,2020-10-28 Women now represent over half of medical school matriculants almost half of residents and fellows and over a third of practicing physicians nationally Despite considerable representation among the physician workforce women are paid 75 cents on the dollar compared with their male counterparts after accounting for specialty geography time in practice and average hours per week worked This pay gap is significantly greater than the one reported

for US women workers as a whole and has shown little improvement over time. While much has been written about the problem, a robust discussion about how to rectify the situation has been missing from the conversation. *Closing the Gender Pay Gap in Medicine* is the first comprehensive assessment of how cultural expectations and compensation methodologies in medicine work together to perpetuate salary disparities between men and women physicians. Since the gender gap reflects a convergence of forces within our healthcare enterprises, achieving pay equity can be an overwhelming undertaking for institutions and their leaders. However, compensation is foremost a business endeavor. Therefore, a roadmap for operationalizing equity within the finance, human resources, and compliance structures of our organizations is critical to eliminating disparities. The roadmap described in this book breaks down the component parts of compensation methodology to reveal their unintentional impact on salary equity and lays out processes and procedures that support new approaches to generate fair and equitable outcomes. Additionally, the roadmap is anchored in change management principles that address institutional culture and provide momentum toward salary equity. The book begins with a review of the evidence on the gender pay gap in medicine. The following chapter discusses how gender-based differences in performance assessments, specialty choice, domestic responsibilities, negotiation, professional resources, sponsorship, and clinical productivity accumulate across women's careers in medicine and impact evaluation, promotion, and therefore compensation in the healthcare workplace. The next two chapters focus respectively on how compensation is determined, highlighting potential pitfalls for pay equity and regulatory and legal considerations. Chapters 5 and 6 explore organizational infrastructure, salary data collection, and analysis, and culture change strategies necessary to rectify compensation inequities. Chapter 7 offers a detailed account of one medical institution's successful journey to achieve salary equity. The book's final chapter emphasizes that closing the gender pay gap is at its essence a business endeavor and recommends that organizations assess progress and cost with the same attention, rigor, and regularity as afforded other operating expenses. *Closing the Gender Pay Gap in Medicine* offers a detailed roadmap for healthcare organizations seeking to close the gender pay gap among their physician workforce. This first of its kind book will assist institutions plan courses of action and identify potential pitfalls so they can be understood and mitigated. It will also prove a valuable resource for transformational leadership and systems-based change, critical to attaining compensation equity.

The Essentials of Clinical Reasoning for Nurses: Using the Outcome-Present State Test Model for Reflective Practice RuthAnne Kuiper, Sandra M. O'Donnell, Daniel J. Pesut, Stephanie L. Turrise, 2017-05-24. In today's healthcare environment of scarce resources and challenges related to safety and quality, nurses must make decisions after decision to ensure timely, accurate, and efficient provision of care. Solid decision making or lack thereof can significantly affect patient care and outcomes. Clinical reasoning, how a nurse processes information and chooses what action to take, is a skill vital to nursing practice and split-second decisions. And yet, developing the clinical reasoning to make good decisions takes time, education, experience, patience, and reflection. Along the way, nurses can benefit from a successful practical model.

that demystifies and advances clinical reasoning skills In *The Essentials of Clinical Reasoning for Nurses* authors RuthAnne Kuiper Sandra O Donnell Daniel Pesut and Stephanie Turrise provide a model that supports learning and teaching clinical reasoning development of reflective and complex thinking clinical supervision and care planning through scenarios diagnostic cues case webs and more
