ECEL 2019 18th European Conference on e-Learning Rikke Ørngreen, Bente Meyer, Mie Buhl, 2019-11-07 *Higher Education - Reflections From the Field - Volume 1*, 2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections: The Perspectives of Higher Education, COVID as a Catalyst for Change, Embracing Online Learning as a Response to COVID, and Post-Covid: The Way Forward. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic. Mosito, 2025-05-26 A historical overview of the evolution of inclusive education alongside the emergence of concepts such as equity and access highlighting how these ideas have evolved been enacted and practiced in the higher education institutions HEIs of South Africa since 2001 *African Security in the Anthropocene* Hussein Solomon, Jude Cocodia, 2023-03-11 Much has been written on security in Africa its democratic deficit poor civil military relations and myriad conflicts but these are often treated in isolation from one another This book takes a different approach as it links all of these issues to the dynamics of the Anthropocene Penned by African scholars on the continent and in the diaspora it examines the different challenges not as separate entities but as outcomes of the Anthropocene Age In this geological epoch humans have become a global force unfortunately not necessarily for good The interaction between humans and the climate the effects of waste the impact of pollution on marine and terrestrial ecosystems

the loss of biodiversity and the change in the chemical composition of the soil oceans and atmosphere are key identifiers of the age of the Anthropocene This has fueled conflict and instability from the vast swathes of the Sahel to Somalia Responding to these issues of insecurity without understanding their inter connectedness and how this relates to the environment can only result in failure From this perspective the current structures in place are inadequate for the task of confronting insecurity at the state and continental levels as represented by the African Union What is needed is a radical reevaluation of Africa s security architecture and approach to security This necessitates pooling sovereignty on a continental and global level It necessitates less state centric responses that include civil society and the business community as equal partners of states in order to collectively confront insecurity in the age of the Anthropocene The authors are academics policy makers and military veterans who have worked in building capacity on the African continent The book is comprehensive in scope strong on theory pragmatic in policy and reflects experience from the field The authors approach makes the book easy interesting and intriguing
