The Talking Point Thomas R. Flanagan, Alexander N. Christakis, 2010-01-01 A Collaborative Project of the Institute for 21st Century Agoras The Talking Point is all about how people learn within groups People can be much smarter than crowds if you measure smart as decision making speed Crowds can be much wiser than individuals if you measure wisdom by depth of understanding It is possible to understand a great deal of information yet or maybe because of this you can also be slow to make decisions If rushed crowds will make poor decisions in spite of their wisdom So to get good group decisions on a time scale that will keep pace with policy development needs and social necessities groups have to be supported so that their decision making process can be accelerated Much has been said and written about this problem over the years It is dangerous to have the power of groups without the wisdom of groups and it is tragic to have the wisdom of groups without the power of groups The Talking Point presents a meeting point for the wisdom and power of groups through the use of Structured Dialogic Design With hopeful intentions as a culture we have poisoned the well just when we need it most We have touted design charrettes and stakeholder processes as engagement vehicles and then ignored marginalized or corrupted the very input that we swore to hold as sacred This has created a myth that large scale collaboration is not possible and the myth has led to considerable disillusionment among would be participants and could be sponsors Structured Dialogic Design seeks to bust the myth about our limited capabilities to sustain boundary spanning collaboration To bust this myth Structured Dialogic Design needs to usher in a new wave of collaborative planning Scholars have identified the Structured Dialogic Design methodology as the cutting edge of third phase science where the reality of a situation embraces interactions between objective findings and subjective intentions The Talking Point provides a window for observing how Structured Dialogic Design has been put into practice and paints a panorama of the issues that confront complex social system design This book is itself a bridge between scholarship and practice written to be accessible yet anchored to major themes in cognitive psychology information systems social systems and models of group learning The book is an invitation for transformational leaders and those who support transformational leaders to pick up a new tool in the essential quest to put our nation and our world back on track toward sustainable futures The Talking Point is a fresh source of water in a world that is thirsty for new ways of solving complex problems **Catalog**

Family and Marital Psychotherapy (Psychology Revivals) Sue Walrond-Skinner, 2014-01-09 The family therapy movement had from its earliest days been marked by a surge of creativity and by the energy of the new ideas it generated Originally published in 1979 the authors of the original essays collected together in this book felt that the time had come to take stock and to scrutinise more carefully the meaning and effectiveness of this new psychotherapeutic method within the particular conditions prevailing in Britain at the time The book focuses on issues relating to theory research and practice and while concentrating on three sub-specialties of family therapy family

group therapy marital therapy and network therapy the papers cover a wide variety of topics In addition to papers by practitioners and teachers of family therapy two contributions are included from the field of academic psychology Before this much of the family therapy literature had been presented in the form of an uncritical eulogy of the method The special interest of this book lies in its attempt to bring a critical perspective to bear upon family therapy and its application Moreover in contrast with much that had been previously written the authors sought to make a distinctive contribution to the development of family therapy through their effort to integrate rather than to polarise what is valuable within a variety of different theoretical and empirical approaches
