Unique Global Imports Key:

China's Vulnerability Paradox Pascale Massot, 2024 China's Vulnerability Paradox explains the uneven transformations in global commodity markets resulting from China's contemporary dramatic economic growth. At times China displays vulnerabilities towards global commodity markets because of unequal positions of market power. Why is it that Chinese stakeholders are often unable to shape markets in their preferred direction? Why have some markets undergone fundamental changes while other similar ones did not? And how can we explain the uneven liberalization dynamics across markets? Through a series of case studies, Pascale Massot argues that the balance of market power between Chinese domestic and international market stakeholders explains their behavior as well as the likelihood of global institutional change. At a time of deepening US-China economic tensions, this book provides an alternative granular understanding of the interacting dynamics between the political economy of Chinese and global markets.

Global Materials Compliance Handbook John Phyper, Philippe Ducas, Peter J. Baish, 2004-01-23 Whether a company operates global facilities or just imports/exports goods to the United States, personnel and advisors must understand regulatory requirements. Most companies that ship or receive goods internationally have developed MCS that address regulatory requirements; however, these typically are labor-intensive, independent of other company systems, adequately address only their primary location, and are not updated in a timely manner. Supply chain logistics is complicated, and this book details how to avoid security holds on shipments and gives sound advice on how to cope if another 9/11 occurs. The book provides easy-to-understand guidance to shipping/receiving personnel, safety inspectors, transportation and logistics managers on the movement of hazardous cargo from one location to another, ensuring compliance to the maze of regulatory requirements.

OECD-FAO Agricultural Outlook 2023-2032 Organisation for Economic Co-operation and Development, Food and Agriculture Organization of the United Nations, 2023-06-29 The Agricultural Outlook 2023-2032 is a collaborative effort of the Organisation for Economic Co-operation and Development (OECD) and the Food and Agriculture Organization of the United Nations (FAO). It brings together the commodity policy and country expertise of both organisations as well as input from collaborating member countries to provide an annual assessment of the prospects for the coming decade of national, regional, and global agricultural commodity markets. The publication consists of 11 chapters. Chapter 1 covers agricultural and food markets; Chapter 2 provides regional outlooks; and the remaining chapters are dedicated to individual commodities.

Maritime Transport and the Climate Change Challenge R. Asariotis, Hassiba Benamara, 2012 Understanding the challenge: Mitigating greenhouse gas emissions from international shipping: Industry perspectives and initiatives.

Economics of the Pandemic Cai Fang, 2021-09-27 The year 2020 marked the time when China expected to attain its goal of building a moderately prosperous society in all respects. Yet it has witnessed the emergence of COVID-19 as a global pandemic that has spread to almost all countries and regions throughout the world. This serious public health disaster has brought with it severe economic shock, resulting in unexpected

challenges to the completion of economic and social development goals This title compiles the latest research from a variety of perspectives into the impact of COVID 19 on the Chinese economy Economic experts and scholars from the Chinese Academy of Social Sciences analyze the current trends as well as short term and long term countermeasures in the agricultural industrial employment and public health sectors and focus on supply and demand They argue that China's actions toward and promotion of economic recovery need to adapt to variability and uncertainty and policy choices should be made in the light of the dialectical relationship between variance and invariance The book will appeal to students and scholars of economics political science and social development

OECD Economic Surveys: Switzerland 2024

OECD,2024-03-14 Switzerland has proved resilient through the pandemic geopolitical turmoil and reverberations in energy markets Unemployment and inflation are low and living standards are among the highest in the OECD This is reinforced by a dynamic market based economy highly skilled workforce and prudent macroeconomic policies Yet slowing growth amid continued price pressures pose challenges A tight monetary policy is necessary to ensure that inflation remains durably within the central bank's target range Although a broadly neutral fiscal stance is warranted in the short term longer term fiscal pressures call for structural reform to counter rising cost of ageing and to support the green transition

Situation and Outlook Series, 1988

Rising Powers and Economic Crisis in the Euro Area Ferdi De Ville,Mattias Vermeiren,2016-06-15 In this book Ferdi De Ville and Mattias Vermeiren examine the linkages between the economic crisis in the euro area and the rise of Brazil India and China BICs in the global monetary and trading system Drawing on the insights of the comparative capitalism literature the authors show

that the latter development has been a key source of the escalation of trade imbalances in the euro area which are widely seen as an important cause of the financial and economic crisis in the region By pointing to the external source of these imbalances and the divergent institutional capacity of the euro area countries to deal with the intensified competition associated with the rise of the BICs De Ville and Vermeiren go beyond the focus on the divergence in unit labor costs as the driving force of these imbalances As such this book provides a comprehensive policy critique of the EU's export led growth strategy based on declining unit labor costs

OECD Reviews of Innovation Policy: Germany 2022 Building Agility for Successful Transitions OECD, 2022-10-04 The COVID 19 pandemic and the Ukraine war have revealed vulnerabilities in Germany's economic model undiversified energy supply an over reliance on fossil fuels delayed digitalisation and disruptable supply chains Digital technologies may significantly disrupt manufacturing industries Germany has dominated for decades threatening future competitiveness
