Unisa Short Learning Programs And Colleges:

The Dynamics of Changing Higher Education in the Global South Busani Mpofu, Sabelo

Ndlovu-Gatsheni, 2020-06-29 Today there are generally universities in Africa rather than African universities. The legitimacy of the university in Africa is under serious questions now because of its complicity in racism, patriarchy, sexism, colonialism, capitalism, genocide, epistemicide, linguicide, culturecide, and alienation. In other words, the university in Africa as we know it today is elitist and exclusionary. Therefore, rethinking the idea of the university is fundamental to overcoming its current deficiencies in the Global South. This volume brings together a number of national case studies and macro analyses on the dynamics of changing higher education in the Global South, gestures towards the desired imagined decolonial African university which should be a site of multilingualism where African indigenous languages, cosmologies, and ontologies become a central part of its identity and soul, intolerant of epistemicides, linguicides, and cultural imperialism, but a site of cognitive and social justice that fully embraces the idea that all human beings are born into valid, useful, relevant, and legitimate knowledge systems.

Sustainable Development in Africa Walter Leal Filho, Rudi Pretorius, Luiza Olim de

Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non-formal education. Sustainable development is very important to Africa, but there is a paucity of publication which documents and promotes experiences from African countries. Due to their complexity, the interrelations between social, economic, and political factors related to sustainable development, especially at universities, need to be better understood. There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges. It is against this background that this book has been produced. It is a truly interdisciplinary publication useful to scholars, social movements, practitioners, and members of governmental agencies and private companies undertaking research and/or executing projects focusing on sustainability from across Africa. As African nations strive to pursue the UN Sustainable Development Goals, it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on-going and future efforts. The scope of the book is deliberately kept wide, and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion, administration, environment, languages, and media studies.

We would like to mention that due to the limitation of the conference venue capacity, we are not able to include many fine papers in the technical program. Our apology goes to those authors.
