Report of Investigations, 1979 **Electronic Properties of Synthetic Nanostructures** Hans Kuzmany, 2004-10-18

The papers in this volume focus on new nanostructured materials The term synthetic nanostructures implies the bottom up synthetic approach as opposed to the top down lithography and etching techniques in nanostructure technology In the field of nanotechnology solid state physics and molecular physics overlap This is nicely illustrated with the example of carbon nanotubes Perpendicular to their axis nanotubes are molecular as their diameter is in the order of a few nanometers and different diameters lead to different electronic structures while along their axis they are extended solids The direction of nanoelectronics research is explored in depth and advancements in composite technology and novel applications for nanotubes are discussed Importantly updates on the theoretical and experimental determinations of structural and electronic properties as well as on characterization methods for molecular nanostructures are included **Architecture and Construction in Steel** Alan Blanc, Michael McEvoy, Roger Plank, 2003-09-02 This book provides a comprehensive guide to the successful use of steel in building and will form a unique source of inspiration and reference for all those concerned with architecture in steel Maintenance and Safety of Aging Infrastructure Dan Frangopol, Yiannis Tsompanakis, 2014-10-23

This book presents the latest research findings in the field of maintenance and safety of aging infrastructure. The invited contributions provide an overview of the use of advanced computational and/or experimental techniques in damage and vulnerability assessment as well as maintenance and retrofitting of aging structures and infrastructures such as *Springer Handbook of Petroleum Technology* Chang Samuel Hsu, Paul R. Robinson, 2017-12-20. This handbook provides a comprehensive but concise reference resource for the vast field of petroleum technology. Built on the successful book *Practical Advances in Petroleum Processing* published in 2006, it has been extensively revised and expanded to include upstream technologies. The book is divided into four parts. The first part on petroleum characterization offers an in-depth review of the chemical composition and physical properties of petroleum which determine the possible uses and the quality of the products. The second part provides a brief overview of petroleum geology and upstream practices. The third part exhaustively discusses established and emerging refining technologies from a practical perspective while the final part describes the production of various refining products including fuels and lubricants as well as petrochemicals such as olefins and polymers. It also covers process automation and real-time refinery-wide process optimization. Two key chapters provide an integrated view of petroleum technology including environmental and safety issues. Written by international experts from academia, industry, and research institutions including integrated oil companies, catalyst suppliers, licensors, and consultants, it is an invaluable resource for researchers and graduate students as well as practitioners and professionals. Energy Research Abstracts, 1984. *Biosensors – Recent Advances and Future Challenges* Paolo Bollella, Evgeny Katz, 2021-01-27. The present book is devoted to all aspects of biosensing in a very broad definition including but not limited to biomolecular composition used in biosensors e.g. biocatalytic enzymes, DNAzymes, abiotic nanospecies with biocatalytic features, bioreceptors, DNA/RNA aptasensors, etc. physical signal transduction mechanisms e.g. electrochemical, optical, magnetic, etc. engineering of different biosensing platforms, operation of biosensors in vitro and in vivo, implantable or wearable devices, self-powered biosensors, etc. The biosensors can be represented with analogue devices measuring concentrations of analytes and binary devices operating in the YES/NO format possibly with logical processing of input signals. Furthermore, the book is aimed at attracting young scientists and introducing them to the field while providing newcomers with an enormous collection of literature references. *Annual Report of the National Advisory Committee for Aeronautics* United States. National Advisory Committee for Aeronautics, 1954. Includes the Committee's Technical reports no. 1-1058 reprinted in v. 1-37.
