

Psychological Themes through Core Studies (Unit 2)

Section C questions

Why psychopaths could be a force for the 'greater good'

In a sample of good people, the genetically awful, mean bunch have found that there are some tasks that are particularly suited for them.

By Claire Coates in London and ... the psychopaths in these studies have been found to be more ruthless. Photograph: David J. Phillip

Most will agree that psychopaths are a bad thing for society. They're cold, ruthless, violent, reckless, and they're often involved in serious crimes, such as murdering innocent people.

However, a new study suggests that psychopaths could act as a force for "greater good". The research, by the University of Plymouth, found that when you need to carry out a bit of utilitarianism – sacrificing one person to save many others, for example – you might be wise to turn to someone with psychopathic traits to get the job done.

In experiments using virtual reality, a utilitarianism model and a decision that involved lives and death, volunteers were asked to make life and death decisions, involving physical force, to save other people. One involved deciding whether to stab to death an injured soldier in your group to prevent them being captured and tortured, or talking them with you at the risk of everyone being captured. Those with psychopathic traits made the right choice a lot more often than those without. They're ruthless, but they did seem to be more thoughtful about the interests of others.
