Jaguar's Shadow Richard Mahler,2009-09-01 When the nature writer Richard Mahler discovers that wild jaguars are prowling a remote corner of his home state of New Mexico he embarks on a determined quest to see in the flesh a big

beautiful cat that is the stuff of legend yet verifiably real Mahler's passion sets in motion a years long adventure through trackless deserts steamy jungles and malarial swamps as well as a confounding immersion in centuries old debates over how we should properly regard these powerful predators as varmints or as icons trophies or gods. He is drawn from border badlands south to Panama's rain forest along a route where the fate of nearly all wildlife now rests in human hands Mahler's odyssey introduces him to unrepentant poachers pragmatic ranchers midnight drug runners ardent conservationists trance induced shamans hopeful biologists stodgy bureaucrats academic philosophers macho hunters and gentle Maya Indians. Along the way he is forced to reconsider the true meaning of his search and the enduring symbolism of the jaguar

Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed,2004 The Cryptozoology of Cats C. P. Marshall,2024-01-21 From exotic wild species inhabiting unfamiliar settings to elusive forms still unknown to science or thought to be extinct the Felidae better known as cats have been reported in sightings from around the world According to conventional wisdom they do not exist but mystery cats of all sizes have attracted increasing attention from naturalists and laypersons alike and the evidence for these animals is becoming more substantial and increasingly difficult to deny Now one of the world's leading cryptozoological investigators and field researchers offers a comprehensive field guide and overview of these mysterious cat like creatures Filled with photographs comprehensive paintings classifications and hard evidence this

book offers an invaluable resource for those who wish to investigate these sightings further or simply enjoy the fascinating reports provided by others Indica Pranay Lal, 2016-12-07 Few places have been as influential as the Indian subcontinent in shaping the course of life on Earth Yet its evolution has remained largely unchronicled Indica A Deep Natural History of the Indian Subcontinent fills this gap From the oldest rocks formed three billion years ago in Karnataka to the arrival of our ancestors 50 000 years ago on the banks of the Indus the author meticulously sifts through wide ranging scientific disciplines and through the layers of earth to tell us the story of India filled with a variety of fierce reptiles fantastic dinosaurs gargantuan mammals and amazing plants Beautifully produced in full colour with a rare collection of images illustrations and maps Indica is full of fascinating lesser known facts It shows us how every piece of rock and inch of soil is a virtual museum and how over billions of years millions of spectacular creatures have reproduced walked and lived over and under it **British National Bibliography** Arthur James Wells, 2005 Walker's Mammals of the World Ronald M. Nowak,1999 Gives an historical account of the world's mammals since 3 000 B C and then provides detailed information about every mammal on Wild Cats of the World Mel Sunguist, Fiona Sunguist, 2017-05-15 Did you know that European earth divided by genus royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow Wild Cats of the World is a treasure trove of answers to questions like these and many others for anyone who s interested in learning more about the world s felids including the ones with whom we share our homes Mel and Fiona Sunguist have spent more than a decade gathering information about cats from every available source many of them guite difficult to find including scientific papers descriptions of hunts archeological findings observations by naturalists and travelers reports from government agencies and newsletters from a wide variety of organizations Weaving information from these sources together with their own experiences observing wild cats around the world the Sunguists have created the most comprehensive reference on felids available Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution ecology and behavior status in the wild and efforts to conserve it Numerous photographs including more than 40 in full color illustrate these accounts Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia Wild Cats of the World will fascinate and educate felid fans of any stripe or spot Псевдонаука и паранормальные явления: Критический взгляд Джонатан Смит, 2023-05-03 BBC Wildlife ,2005 The School Science Review ,2005 Small Carnivores Emmanuel Do Linh San, Jun J. Sato, Jerrold L. Belant, Michael J. Somers, 2022-07-25 Small Carnivores Evolution Ecology Behaviour and Conservation This book focuses on the 232 species of the mammalian Order Carnivora with an average body mass 21 5 kg Small carnivores inhabit virtually all of the Earth's ecosystems adopting

terrestrial semi fossorial semi arboreal or semi aquatic lifestyles They occupy multiple trophic levels and therefore play important roles in the regulation of ecosystems such as natural pest control seed dispersal and nutrient cycling In areas where humans have extirpated large carnivores small carnivores may become the dominant predators which may increase their abundance mesopredator release to the point that they can sometimes destabilize communities drive local extirpations and reduce overall biodiversity On the other hand one third of the world's small carnivores are threatened or near threatened with extinction This results from regionally burgeoning human populations industrial and agricultural activities causing habitat reduction destruction fragmentation and pollution Overexploitation persecution and the impacts of introduced predators competitors and pathogens have also negatively affected many small carnivore species Although small carnivores have been intensively studied over the past decades bibliometric studies showed that they have not received the same attention given to large carnivores Furthermore there is huge disparity in how research efforts on small carnivores have been distributed with some species intensively studied and others superficially or not at all This book aims at filling a gap in the scientific literature by elucidating the important roles of and documenting the latest knowledge on the world's small carnivores pThis is a book that has been needed for decades It is the first compendium of recent research on a group of mammals which has received almost no attention before the early 1970s This book covers a wide range of subdisciplines and techniques and should be considered a solid baseline for further research on this little known group of highly interesting mammals As our knowledge regarding how ecosystems function increases then the valuable role of small carnivores and the necessity for their conservation should be regarded as of paramount importance. The topics covered in this book should therefore be of great interest not only to academics and wildlife researchers but also to the interested layman
