Revolutions in Learning and Education from India Christoph Neusiedl, 2021-02-15 This book offers an important critique of the ways in which mainstream education contributes to perpetuate an inherently unjust and exploitative Development model Instead the book proposes a new anarchistic postdevelopmental framework that goes beyond Development and schooling to ask what really makes a meaningful life Challenging the notion of Development as a win win relationship between civil society the state and the private sector the book argues that Development perpetuates a hierarchical world order and that the education system serves to reinforce and re legitimise this unequal order Drawing on real life examples of unschooling and self designed learning in India the book demonstrates that more autonomous approaches such as these can help to fundamentally challenge dominant ideas of education equality development and what it means to lead meaningful lives The interdisciplinary approach pursued in this book makes it perfect for anyone with interests across the areas of education development studies radical political theory and philosophy

The Derrick Jensen Reader Derrick Jensen,2012-07-03 In an age marked by seemingly unstoppable environmental collapse and the urgent quest for solutions environmental philosopher Derrick Jensen the voice of the growing deep ecology movement reveals for us new seeds of hope Here for the first time in The Derrick Jensen Reader are collected generous selections from his prescient unflinching books on the problem of civilization and the path to true resistance In the acclaimed A Language Older Than Words Jensen dissects his own abusive childhood to examine the pathology of Western culture and shares with us the power and beauty of an

alliance with the natural world He continues to use the lens of his own experience as well as the wisdom of philosophers activists and teachers to expose oppression and call us to action in his other early works *Listening to the Land A Culture of Make Believe Strangely Like War and Walking on Water* We see his analysis deepen when he asks us to accept that the only moral response to biocide is resistance in the two volume *Endgame* a truth he explores further in *Thought to Exist in the Wild What We Leave Behind* the graphic novel *As The World Burns* and in his two novels *Songs of the Dead* and *Lives Less Valuable* And in *Dreams* Jensen s latest work he leads us still further toward his vision for a healed planet freeing us to see beyond the limits of our present culture to a future luminous with meaning **Endgame, Volume 2** Derrick

Jensen,2011-01-04 Whereas Volume 1 of *Endgame* presents the problem of civilization Volume 2 of this pivotal work illustrates our means of resistance Incensed and hopeful impassioned and lucid *Endgame* leapfrogs the environmental movement s deadlock over our willingness to change our conduct focusing instead on our ability to adapt to the impending ecological revolution **Rethinking English in Schools** Viv Ellis,Carol Fox,Brian Street,2007-11-20 Why should young people study a subject called English This question lies at the heart of this fascinating monograph which brings together the diverse perspectives of many leading thinkers about English and literacy education This meticulously researched and well written collection takes as its starting point the importance of the history of the subject in the formation of its constitution and its boundaries First and foremost it proposes that questions of aims and values have informed these choices Equally it suggests that returning to these educational questions helps us to understand curriculum and pedagogy in complex ways that a simple focus on content and methods neglects Curriculum and pedagogy bring learners teachers institutions and the wider society into the debate *Towards Critical Environmental Education* Aristotelis S. Gkiolmas,Constantine D.

Skordoulis,2020-11-03 This volume discusses theory philosophy praxis and methods in Environmental and Ecological education and considers the junction with the main visions and issues of Critical Pedagogy The volume and its separate chapters address four axes which can also be seen as the guidelines of the content as well as the central objectives of the book The first axis concerns the missing theoretical and practical pieces at this point in time The volume considers the issues that are not included in contemporary Environmental Education and thus deprive it from critical orientations This implies that in Environmental Education very little discussion exists about the political economic racial gender and class issues that in most cases govern the actions of leaders and stake holders The second axis concerns what has been done so far and in what directions This involves descriptions of theoretical approaches or actual applied methodologies in the classroom such as curricula or syllabus used or the kind of actions certain educators have taken to infuse the issues of justice and critical reflection within the Environmental Education teaching agenda The third axis examines proposals It looks at ways to enrich domains of Environmental Education with the argumentations of Critical Pedagogy The fourth axis concerns the way in which proposals can be effectuated This part contains specific methodologies and teaching sequences depicting ways of including

major aspects of Critical Pedagogy and Critical Education in Environmental Education Examples are Non anthropocentric ecological approaches in the classroom political activism in the Curricula mixture of field activities and political activities
