*Taking Your Customer Care™ to the Next Level* Steve Brubaker, Nadji Tehrani, 2015-08-28 Companies spend big money and significant resources to acquire new customers but they tend to give little thought on how to keep their business. That's a big mistake. Nadji Tehrani and Steve Brubaker, both Customer Care experts, explore how to go the extra mile in keeping customers happy. Whether you work at a startup or an established organization, you'll find proven strategies that will help you define and deliver extraordinary Customer Care, duplicate the practices of companies that provide great customer service, avoid practices of companies that have failed to deliver on their promises, devote more resources to keeping current customers happy, develop incentives, policies, and training to encourage staff to solve problems. Examples from companies such as Ace Hardware, Amazon, American Express, Apple, Disney, The Ritz Carlton, Starbucks, Southwest Airlines, Wine Enthusiast, and Zappos make this an essential guide for any professional who wants to forge stronger relationships with customers. Everyone knows that it's far less expensive to keep existing customers than it is to win and onboard new ones. That's just one of the many reasons to learn the lessons in *Taking Your Customer Care to the Next Level*. *Connected Consumer and the Future of Financial Services* Patrick Molineux, 2012-08-07 Whether you pay the bills or issue them, financial services are changing. From banking to insurance to investments, financial services are being transformed by consumers who are connecting to the Internet in unprecedented numbers globally, driving 4 trends: Mobile, Mobile phones, tablets, and cards are revolutionizing payments and financial processes such as insurance claims. Mobile money, notably in Africa, is a driving force. Micro, Microinsurance, microsavings, and microcredit are transforming underserved markets using technology. Media, Social media, and peer-to-peer (P2P) are the big disrupters, enabling P2P payments and P2P lending. Mining Enterprises and consumers can mine the vast troves of structured and unstructured data for financial insights. Data can completely redefine risk. Financial services firms must explore the connected consumer for their business. Consumers must understand how financial services are changing and their role in that change. **Internet Retailing**, 1999 [American Banker](#), 2002 **Chain Store Age**, 2004-07 **Inside the FDIC** John F.
