Purkinje Fibers: 15-40bpm (significantly diminished CO)

### **ECG Complex**

P-wave: Atrial Depolarization

QRS Complex: Ventricular Depolarization

T-wave: Ventricular Repolarization

### **PR Interval (PRi) → 0.12-0.20 sec**

Conduction from SA to AV Node

Prolonged indicates First Degree AV Block

### **QRS Interval → Less than 0.12 sec**

Conduction through Bundle Branches and Purkinje Fibers

Prolonged indicates Bundle Branch Block

### **QT Interval → Less than half of R-R interval**

Time of electrical cycle within the ventricles

Normal is determined according to HR

*Critical Care Study Guide* Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU neurosurgical emergencies acute coronary syndromes cardiac arrhythmias role of whole body rehabilitation in the ICU ethical conduct of human research in the ICU and nursing care of the ICU patient. **CRITICAL CARE NURSE** National Learning Corporation, 2019 *Pediatric Critical Care Study Guide* Steven E. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner.
