- **Exponential growth**
 - **Exponential growth** is the increase in the number of individuals in a population over time, where the rate of increase is proportional to the current population size.
 - **Exponential growth** is characterized by a constant rate of increase, resulting in a population that grows at an ever-increasing rate.
 - **Exponential growth** is often represented by a J-shaped curve on a graph of population size over time.
 - **Exponential growth** is a common model for population growth in the early stages of a population's history, before resources become limiting.
