Law of the Sea, Environmental Law and Settlement of Disputes Tafsir Malick Ndiaye, Rüdiger Wolfrum, 2007-11-30 This volume covers a variety of topics in the fields of the law of the sea and the protection of the environment. The particular focus of the volume is on the role and function of judicial, quasi-judicial and administrative institutions in the prevention and settlement of disputes in both of these areas. This includes an overview and insightful analysis of the cases of the International Tribunal for the Law of the Sea during its first decade. Further substantive issues range from the allocation of shared marine resources, maritime boundary delimitation and issues of maritime security to the prevention of marine pollution as well as a coverage of the compliance and enforcement mechanisms of international environmental law. The views from both scholars and practitioners' perspectives presented in this volume will offer readers a number of outstanding intellectual synergies to reflect on the development of international law. It can provide both scholars and policy makers alike with new insights on how to address pressing problems in international law including ideas for improved institutional design. The work has been compiled in honour of Thomas A Mensah and comprises 59 essays from leading scholars and practitioners in international law.

The Exclusive Economic Zone Charles Quince, 2019-02-15 Traditionally the law of the sea was divided into the territorial sea and the high seas which accounted for the application of different rules under different circumstances. Concerning the territorial sea the coastal state enjoys full sovereignty to the right of innocent passage while under the high seas rules all countries enjoy multifaceted uses of the sea qualified only by the limitations imposed by international law. The development of the exclusive economic zone ended this traditional dualism and ushered in guidelines that are embodied within the text of the LOS Convention. The Exclusive Economic Zone presents to academia and the general reading public a comprehensive study of the EEZ concept as it relates to the LOS Convention and state practice. The Exclusive Economic Zone shows that even though coastal states have the right to develop a 200 miles EEZ and that this right is an integral part of contemporary international relations it is also true that the EEZ concept is shrouded in legal ambiguities. Using qualitative and inductive methods the scholarship draws on treaties, official proclamations, government archives and scholarly works that are germane to the development of the EEZ. Students, scholars and members of the general public with an interest in international law will find that The Exclusive Economic Zone deepens their understanding of the evolution of the EEZ concept.

Maritime Power and the Law of the Sea: James Kraska,2011-01-19 In Maritime Power and the Law of the Sea Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing legal order of the oceans fuses diplomacy strategy and international law to directly challenge unimpeded access to coastal areas with profound implications for American grand strategy and world politics
