Bernice Z. Schacter,1999-12-30 Recent advances in biotechnology in areas as diverse as agriculture the environment food  
and healthcare have led to much debate and media attention This unique reference resource for advanced high school  
students and teachers explores the science behind these new technologies and examines the stakeholders and their stakes in  
the various debates The author presents views of scientists doctors insurance companies and big businesses among others on  
such issues as genetic testing patenting of human gene sequences cloning and genetically engineered food Each chapter  
addresses a specific issue with the goals of helping readers understand all the different ways biotechnology is being explored  
and implemented in our lives today as well as to critically perceive the arguments being made concerning these issues  
Students will learn there is more to biotechnology than cloning sheep that it is also used for such purposes as making cheese  
and beer Each topic is presented as a Case Study describing of a range of technologies and a diversity of stakeholders that  
will allow users to draw their own conclusions This introduction to the technologies and the debates surrounding them also  
encourages students to take advantage of the many available sources for further research particularly on the Internet
