Annual Plant Reviews, The Plant Cytoskeleton in Cell Differentiation and Development Patrick J. Hussey, 2009-02-12 Annual Plant Reviews Volume 10 The cytoskeleton is a dynamic filamentous structure composed of at least actin and microtubule networks Actin and microtubules are no different structurally from their animal and fungal counterparts However the strategies of cell differentiation and development in plants require this network to respond appropriately to plant specific developmental cues and to environmental factors This book views the cytoskeleton from different perspectives but on the whole as a network composed of structural and regulatory proteins controlled by internal and external stimuli that result in different aspects of cell differentiation This is a volume for researchers and professionals in plant biochemistry cell biology and genetics
