#### **Head of the Particles-Biology Interactions Laboratory at Empa**

As part of Empa laboratory for Particles-Biology Interactions, we are conducting research related to the diagnosis and therapeutics for clinical needs, by steering and understanding the interaction of particulate matter with human cells and tissues. Intersecting this with the computational knowledge we have, we can integrate large-scale data into hazard assessment needed for risk assessment and SSbD. We will support the interdisciplinary INSIGHT team in the graphene case study with EHS standards and socio-economical aspects.
