The Global Financial Crisis and Austerity David Clark, 2015-11-30 Given the huge impact of the 2008 financial crash and post-crash austerity on so many people's lives, there is a need for a concise, accessible guide to its causes and its longer-term significance. Written by an expert in political science and straddling finance, economics, and political science, this entry-level summary demystifies global finance and puts the financial crisis in its historical context. It also outlines the policy responses of Western governments to the crash and the ensuing recession and turn to austerity. Supplemented by an appendix with an A-Z glossary of key terms, processes, and institutions, the book concludes by asking if the crisis is really over and outlines possible future scenarios, making it an impressive overview for anyone with little or no previous knowledge of the subject.

BRICS and International Tax Law Peter Antony Wilson, 2016-04-24 With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows, the five governments both individually and through cooperative initiatives have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI both inbound and outbound while complying with international obligations, including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: information exchange procedures and pitfalls; response to the OECD's Base Erosion and Profit Shifting (BEPS) initiative; role of bilateral and multilateral double taxation conventions, including the Multilateral Instrument and the Bilateral Investment Treaties; thin capitalization; transfer pricing; controlled foreign corporation rules; shortcomings related to authorities' limited manpower; international audit and investigation procedures; the BRICS approach to residence and mandatory and binding arbitration; and the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities as well as with leading BRICS academics and practitioners. Tax cases together with human rights and investment

cases and administrative guidelines in all the countries are also included in the analysis. The study concludes with recommendations for improving each of the countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance, an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.

Transfer Pricing and Financial Transactions Michael Lang, Raffaella Petrucci, 2022-03-16. Transfer pricing and financial transactions: Issues and developments. Since years, issues related to transfer pricing and intra-group financing are prominent in the agendas of both taxpayers and governments. The extreme relevance of these topics and the need to address them has attracted the interest of various international organizations for a long time. Already in 1972, the OECD emphasized that these topics required further attention, and the 1979 OECD Transfer Pricing Report dedicated an entire chapter to issues concerning loans. However, the first OECD Transfer Pricing Guidelines issued in 1995 did not include a chapter on these issues. Twenty-five years later, in February 2020, the OECD finally released its 2022 Transfer Pricing Guidelines on Financial Transactions, which became Chapter X of the OECD Transfer Pricing Guidelines. Meanwhile, in 2021, the United Nations included these topics in Chapter 9 of its Practical Manual for Developing Countries. With those welcomed recent developments from the OECD and the UN, the topic is now being extensively discussed, especially considering the necessary implementation of the guidance at the national level and the future answers from the tax courts at national and European levels when dealing with this matter. This publication discusses the most important issues and recent developments related to this topic. Beginning with an in-depth analysis on the accurate delineation of financial transactions, it further deals with the specific transactions concerning loans, financial guarantees and cash pooling. This book is based on the outcomes of the presentations and discussions held during the WU Transfer Pricing Symposium held in October 2021 at the WU Vienna University of Economics and Business. The authors, apart from providing a theoretical background to the discussed issues, also present case studies that show how those issues can be approached in practice.
