Banana: Genomics and Transgenic Approaches for Genetic Improvement Sukhada Mohandas,Kundapura V. Ravishankar,2016-09-08 Bananas and plantains are among the most important food and cash crops in the world They are cultivated in more than 135 countries across the tropics and subtropics with an annual global production of ca 130 million metric tonnes Though bananas are one of the most important components of food security in many developing countries banana production is threatened by both abiotic and biotic stresses These include a wide range of diseases and pests such as bunchy top virus burrowing nematodes black Sigatoka or black leaf streak Fusarium wilt etc In recent years considerable progress has been made and several biotechnological and genomic tools have been employed to help understand and unravel the mysterious banana genome Molecular and genomic studies have helped to decipher the Musa genome and its evolution Genetic linkage map and whole genome sequencing of both Musa acuminata and Musa balbisiana progenitors of cultivated banana have completely changed the way of thinking and the approach on banana crop improvement Whole genome sequencing has helped to improve the selection of quantitative traits such as yield as well as the selection of optimal parents for developing required hybrids in breeding programs Gene isolation and the analysis of mutants have helped in the characterization of genes of agronomic value and the associated regulatory sequences With the advent of molecular markers and new statistical tools it is now possible to measure the diversity identify genes and useful alleles linked to important agronomic traits Further these alleles can be incorporated into cultivars through marker assisted selection or through transgenic approach Transgenic approaches are potential tools for direct transfer of these genes into popular cultivars which are generally not amenable for conventional breeding techniques in specific with crops such as bananas which are sterile triploid and heterozygous thereby making it difficult to reconstruct the recurrent genotypes in banana Transgenic techniques thus have helped overcome the difficulty of working with sterile triploid banana crop In the last five years enormous amount of new information and techniques have been generated for banana A comprehensive book entitled Banana Genomics and Transgenic Approaches for Genetic improvement on banana genomics latest transgenic technologies and tools available for improved crop development in banana will address all these requirements *Open Secret* Human Rights Watch (Organization),Maria Burnett,2009 This 89 page report documents the task force s abusive response to alleged rebel and terrorist activity by unlawfully detaining and brutally torturing suspects

Guidelines for sustainable tick control and acaricide resistance management in livestock Food and Agriculture Organization of the United Nations,2025-05-23 These guidelines offer a comprehensive resource for managing tick control and tackling acaricide resistance in livestock They emphasize the growing problem of acaricide resistance which has been observed in various regions The document provides in depth information on tick biology available synthetic chemical controls and the underlying

mechanisms of acaricide resistance It stresses the importance of continuously monitoring tick populations and resistance levels to inform more effective control strategies To address this resistance the guidelines recommend Integrated Tick Management ITM a holistic approach that integrates chemical treatments with non chemical methods This strategy aims to reduce acaricide use helping to slow resistance development and minimize potential environmental and public health risks Additionally the guidelines highlight the necessity of strong regulatory frameworks to ensure the quality safety and effectiveness of tick control products In conclusion these guidelines deliver a thorough overview of the challenges and strategies related to tick control and acaricide resistance advocating for sustainable practices and ongoing research to improve livestock health and productivity while reducing the risks posed by tick infestations and the diseases they transmit

Dryland Husbandry in Uganda E. N. Sabiiti, Tegegne Teka, 2004 The pastoral communities in Uganda face shrinking grazing resources chronic water shortages livestock diseases frequent droughts and gender inequity in access to resources It is a sector that contributes significantly to the national economy 95% of the livestock under pastoral production contributing about 17% of GDP besides providing food security however in the past there has been little provision for research Hence this welcome initiative of the Dryland Husbandry Project The project carries out research and development involving pastoralists in the management and conservation of their resources This book represents the compilation of ten research papers ensuing from the project tackling different aspects of the rangelands It concludes with a series of recommendations for government interventions in order to sustain the utilisation and managements of the drylands in Uganda
