The Physical Care of People with Mental Health Problems Eve Collins, Mandy Drake, Maureen Deacon, 2013-01-15
This accessible practical text provides mental health practitioners with the core knowledge and skills they need to be able to care effectively for the physical health of those who have been diagnosed with mental illness. Linked closely to professional standards and with a clear values and evidence base, the book aims to raise awareness of the physical health needs of individuals with mental health problems, outline the physical health assessment process and suggest health enhancing interventions for use in clinical practice. Consideration will be given to the following aspects of physical wellbeing: cardiovascular health, diabetes, sexual health, respiratory health, cancer, wound care, substance misuse, infection control, medicine management. Further chapters on legal and ethical issues explain the need to practise appropriately within the Mental Health Act and the Mental Capacity Act, while a linking theme throughout the book stresses the importance of health promotion. Backed up by case examples and with a range of reflective exercises throughout, *The Physical Care of People with Mental Health Problems* is a key text for students and practitioners working in mental health services. It will also be useful reading for practice nurses, district nurses, midwives and all allied health practitioners.

Guide to Psychological Assessment with African Americans Lorraine T. Benuto, Brian D. Leany, 2014-11-20
The movements toward cultural sensitivity and evidence based practice are watershed developments in clinical psychology. As a population with a long history of substandard treatment from mental health systems, African Americans have especially benefitted from these improvements. But as with other racial and ethnic minorities, finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge. *The Guide to Psychological Assessment with African Americans* aims to close the evaluation therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality. Expert contributors analyze scarce and far flung data, identify strengths and limitations of measures and norms in their use with African American clients and advise on avoiding biases in interpreting results. The editors advocate for a theory based hypothesis testing approach to assessment when empirical evidence is lacking and offer guidelines for decision making that is effective as well as ethnically aware. The Guide's findings, insights and practical information cover the gamut of test and diagnostic areas including IQ and personality, Generalized anxiety disorder, panic and phobias, Neuropsychological assessment, cognitive decline and dementia, Mood disorders and suicidality, Forensic assessment, risk and recidivism, Measures specific to children and adolescents, Plus PTSD, substance disorders, eating pathology and more. Expertly complementing cross cultural treatment texts, *The Guide to Psychological Assessment with African Americans* stands out as a trustworthy resource for treatment planning, useful to clinical psychologists, neuropsychologists and clinical social workers.
