Mazurek, 2012-10-16 Target Audience This text is designed for the first course in Statics offered in the sophomore year
Overview The main objective of a first course in mechanics should be to develop in the engineering student the ability to
analyze any problem in a simple and logical manner and to apply to its solution a few well understood basic principles This
text is designed to help the instructor achieve this goal Vector analysis is introduced early in the text and is used in the
presentation and discussion of the fundamental principles of mechanics Vector methods are also used to solve many
problems particularly three dimensional problems where these techniques result in a simpler and more concise solution The
emphasis in this text however remains on the correct understanding of the principles of mechanics and on their application
to the solution of engineering problems and vector analysis is presented chiefly as a convenient tool In order to achieve the
goal of being able to analyze mechanics problems the text employs the following pedagogical strategy Practical applications
are introduced early New concepts are introduced simply Fundamental principles are placed in simple contexts Students are
given extensive practice through sample problems special sections entitled Solving Problems on Your Own extensive
homework problem sets review problems at the end of each chapter and computer problems designed to be solved with
computational software Resources Supporting This Textbook Instructor s and Solutions Manual features typeset one per
page solutions to the end of chapter problems It also features a number of tables designed to assist instructors in creating a
schedule of assignments for their course The various topics covered in the text have been listed in Table I and a suggested
number of periods to be spent on each topic has been indicated Table II prepares a brief description of all groups of problems
Sample lesson schedules are shown in Tables III IV and V together with various alternative lists of assigned homework
