What Makes a Great Exhibition? Paula Marincola, 2007-02-16 For better or worse museums are changing from forbidding bastions of rare art into audience friendly institutions that often specialize in blockbuster exhibitions designed to draw crowds But in the midst of this sea change one largely unanswered question stands out What makes a great exhibition Some of the world's leading curators and art historians try to answer this question here as they examine the elements of a museum exhibition from every angle What Makes a Great Exhibition investigates the challenges facing American and European contemporary art in particular exploring such issues as group exhibitions video and craft and the ways that architecture influences the nature of the exhibitions under its roof The distinguished contributors address diverse topics including Studio Museum in Harlem director Thelma Golden's examination of ethnically focused exhibitions and Robert Storr director of the 2007 Venice Biennale and formerly of the Museum of Modern Art on the meaning of exhibition and exhibitionmaker A thought provoking volume on the practice of curatorial work and the mission of modern museums What Makes A Great Exhibition will be indispensable reading for all art professionals and scholars working today

U.S. International Exhibitions during the Cold War Andrew James Wulf, 2015-01-30 Although cultural diplomacy has become an increasingly fashionable term embraced by academics foreign service personnel and private sector commercial and cultural interests the very practice of this idea remains conspicuously challenging to define This book takes on this problem advancing a new understanding of cultural diplomacy that results from

a historical investigation of a single area of government and private sector partnership and what became in the mid twentieth century the most prominent manifestation of this alliance the cultural exhibitions sent abroad to tell America s story with the goal of winning hearts and minds To illustrate this point selected exhibitions and the intentions of the policymakers who proposed them are interrogated for the first time beside archival documentation writings from the history of design advertising science as well as art historical and museum studies theories that address various aspects of the history of collecting and display all of which explore the reality of how these exhibitions were conceived and prepared for foreign audiences Most importantly personal interviews with the designers and government representatives responsible for the ultimate appearance of these events upturn preconceived notions of how these events came to be Seventy five photographs from the exhibits make this history come alive Through this discussion these questions are answered What was America showing of itself through these exhibitions And more urgently what do these exhibitions tell us about U S interest in verisimilitude This investigation spans the crucial years of American exhibitions abroad 1955 1975 beginning with the formation of an official system of exhibiting American commercial wares and political ideas at trade fairs through official exchanges with the U S S R to pavilions at world s fairs and finally to museum exhibitions that signaled a return to the display of founding American values They are thus complex ideological symbols in which concepts of national identity globalization technology consumerism design and image management both coincided and clashed The investigation of these exhibitions enhances the understanding of a significant chapter of U S cultural diplomacy at the height of the Cold War and how America constantly reimagined itself

study to situate children's literature within the consumer culture of this period *British Children's Literature and Material Culture* explores the intersection of children's books, consumerism and the representation of commodities within British children's literature. In tracing the role of objects in key texts from the turn of the century, Jane Suzanne Carroll uncovers the connections between these fictional objects and the real objects that child consumers bought, used, cherished, broke and threw away. Beginning with the Great Exhibition of 1851, this book takes stock of the changing attitudes towards consumer culture, a movement from celebration to suspicion, to demonstrate that children's literature was a key consumer product, one that influenced young people's views of and relationships with other kinds of commodities. Drawing on a wide spectrum of well-known and less familiar texts from Britain, this book examines works from Lewis Carroll's *Through the Looking Glass* and *What Alice Found There* and E. Nesbit's *Five Children It* to Christina Rossetti's *Speaking Likenesses* and Mary Louisa Molesworth's *The Cuckoo Clock*. Placing children's fiction alongside historical documents, shop catalogues, lost property records and advertisements, Carroll provides fresh critical insight into children's relationships with material culture and reveals that even the most fantastic texts had roots in the ordinary, everyday things. Curating Design Donna Loveday, 2022-08-11 Illustrated with contemporary case studies, *Curating Design* provides a history of and introduction to design curatorial practice both within and outside the museum. Donna Loveday begins by tracing the history of the collecting and display of designed objects in museums and exhibitions from the 19th-century cabinet of curiosities to the present-day design museum. She then explores the changing role of the curator since the 1980s, with curators becoming much more than just keepers of a collection, with a remit to create narrative and experiential exhibitions as well as develop the museum's role as a space of learning for its visitors. *Curating as a practice* now describes the production of a number of cultural and creative outputs ranging from exhibitions to art festivals, shopping environments to health centres, conferences to film programming as well as museums and galleries. Loveday explores how design has come to the fore in curatorial practice, with new design museums opening around the world as well as blockbusting exhibitions of fashion and popular culture. Interviews with leading practitioners from international design and arts museums provide a spotlight on contemporary challenges and best practice in design curatorship. Future of Cricket Chris Rumford, 2013-09-13 Cricket is a sport which is currently undergoing a rapid and dramatic transformation. Traditionally thought of as an English summer game limited in appeal to Britain and its Commonwealth, cricket has in the past a few years achieved a global profile. This is largely due to the development of a new TV friendly format of the game, Twenty20 cricket. Indeed, through the economic and media interests promoting the Indian Premier League (IPL), the world's richest Twenty20 tournament, cricket has belatedly gone global. The rapid rise of the IPL underlines that the economic and political characters within cricket are no longer the traditional elites in metropolitan centres but the businessmen of India and the media entrepreneurs world wide who seek to shape new audiences for the game and create new marketing opportunities on a global scale. The contributions in this book fall into two broad categories. There are firstly those which explore the rapid growth of Twenty20, particularly the motors of change and the new directions that cricket is taking as a result of the Twenty20 revolution. Secondly, there are a number of contributions which chart the impact of Twenty20 on traditional elements of the game. This book was originally published as a special issue of *Sport in Society*.
