The Youth Dividend Jan H. Hofmeyr, 2012 **Transforming**

Transformation in Research and Teaching at South African Universities Rob Pattman, 2018-12-20 What is transformation in contemporary South African higher education How can it be facilitated through research and pedagogic practices These questions are addressed in this edited collection by established academics and emerging research students from nine South African universities The chapters give us access to students worlds how they construct experience and navigate their complex spheres on and off campus

Black Tax Niq Mhlongo, 2019-09-12 The real significance of this book lies in the fact that it tells us more about the everyday life of black South Africans It delves into the essence of black family life and the secret anguish of family members who often battle to cope Niq Mhlongo A secret torment for some a proud responsibility for others black tax is a daily reality for thousands of black South Africans In this thought provoking and moving anthology a provocative range of voices share their deeply personal stories With the majority of black South Africans still living in poverty today many black middle class households are connected to working class or jobless homes Some believe supporting family members is an undeniable part of African culture and question whether it should even be labelled as a kind of tax Others point to the financial pressure it places on black students and professionals who as a consequence struggle to build their own wealth Many feel they are taking over what is essentially a government responsibility The contributions also investigate the historical roots of black tax the concept of the black family and the black middle class In giving voice to so many different perspectives Black Tax hopes to start a dialogue on this widespread social phenomenon

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories

The Next Twenty-five Years David Lee Featherman, Marvin Krislov, Martin Hall, 2009-12-18 A must read for anyone who cares about the future of higher education in diverse democracies

Students' participation in university governance in South Africa Vuyo Mthethwa, 2023-03-01 The

purpose of this book is to examine the academic experiences of students who participated in university governance at South African universities. Scrutiny is placed on the alignment of student representative council constitutions and university statutes with the actual experiences students had in discharging their roles in governance and in the way this impacted their academic progress. Through a multi-site case study design, semi-structured interviews were conducted with members of the student representative council who participated in university governance and supported by document analysis and observations to generate the data. The study adopted Tinto's Integration Theory and Astin's Theory of Involvement as the two frameworks are based on the relationship between students' extra-curricular activity and their academic experiences. The study invokes a greater awareness of students as major stakeholders in governance and informs policies and practices that may better serve students' academic experiences. The study will contribute to the understanding of cooperative governance principles while drawing from the perspective of the students on their understanding, limitations and challenges in discharging their roles in university governance.

Going to University Case, Jennifer, Marshall, Delia, 2018-02-09 Around the world more young people than ever before are attending university Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children But alongside the overwhelming demand for higher education questions about its purposes have intensified Deliberations about the curriculum culture and costing of public higher education abound from student activists academics parents civil society and policy makers We know from macro research that South African graduates generally have good employment prospects But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses And even less is known about what happens to those who drop out This accessible book brings together the rich life stories of 73 young people six years after they began their university studies It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities
