What Is God Can Religion Be Modeled:

What Is God? Thomas B. Sheridan, 2014-12-24 An eminent psychologist and engineer presents a provocative analysis of the concept of God through the lens of scientific inquiry This is a study of the concept of God not from the perspective of any religious tradition but as a pervasive social phenomenon that has prevailed through the ages An expert in engineering and applied psychology author Thomas B Sheridan offers unique perspective on the subject In What Is God he asks whether the concept of God can be modeled in denotative language much as modeling in science medicine and modern professions in contrast to connotative language e g myth metaphor art and music Sheridan adopts the assumption of model based reality as currently prevalent in physics and some branches of philosophy That criterion means an entity can be called real for public discourse purposes only to the extent that a credible model can be made of what the entity is or how it works as opposed to the private reality of thoughts perceptions or dreams What follows is a truly provocative and enlightening through experiment with far reaching implications It is rare to see the ultimate question of God as prime mover examined as a problem open to rigorous scientific inquiry Thomas Sheridan has now done it with admirable clarity Edward O Wilson Pulitzer Prize winning author of The Meaning of Human Existence

The Geologic Model of Religion Andrew Clifford, 2012-07-17 Men are haunted by the vastness of eternity The opening line of the film Troy captures the tragic essence of personal mortality ones passing into oblivion and fading from all memory Since the prehistoric dawn of humanity death has shadowed everyone s footsteps Even into the current scientific era religion has long been the only defense The sole comfort against oblivion offering a promise of new life or even immortality The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings drawing upon archaeology anthropology and comparative religion to clearly explain one of the most complex subjects known From the study a new model emerges which Decomposes religion into its distinct worldview and afterlife paradigms Categorizes evidence of belief systems held by prehistoric hunter gatherers culminating in the Temples of Rebirth such as Gobekli Tepe Concludes that spirituality began in the Fertile Crescent 11 000 years ago spreading with the Neolithic revolution throughout the world Shows why judgment in afterlife was the keystone in the emerging edifice of civilization and how it enabled hierarchies overcoming Dunbar s number which limited village sizes Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100 000 books written about religion but the Geologic Model of Religion is unlike any other Drawing upon evidence from anthropology archaeology and scripture religion is divided into worldviews and afterlife paradigms This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies

monolithic body of beliefs and practices The authors concede that the concept religion is too fluid to be delineated precisely The book s approach to the relationship between religions i e theology of religions reflects how the authors understand the origin and nature of religion a theology of religion in the singular This book focuses more on theology of religions plural than on theology of religion singular The main objective of the book is to present a variety of perspectives on how theology of religions manifested in different contexts This includes historical i e Luther s theology of religions and the Roman Catholic position on other religions as taken by Vatican II as well as cultural and religious perspectives In the first chapter the editor gives a brief overview of the development of the discipline of theology of religions The postmodern era is characterised by an almost non foundational approach The second chapter traces the development of the discipline in the Roman Catholic tradition in particular This contribution is based on the insights of P J van der Merwe 1944 2014 who as researcher and Head of the Department of Science of Religion and Missiology at the University of Pretoria developed a specific theological position on non Christian religions A whole generation of theologians was trained in this school of thought He passed away in 2014 and this publication pays tribute to his life s work on religions and their relations The contributions that follow are the culmination of the research of postgraduate students at the University of Pretoria The third chapter presents a perspective on the Reformation with a particular focus on Martin Luther In this year of the quinqucentenary anniversary of the Reformation the legacy of Reformed belief is highlighted The fourth chapter describes the relationship between Christianity and Islam from the perspective of a willingness to embrace The fifth chapter analyses the relation between Christianity Judaism and Islam from the perspective of intergroup threat theory A model for theology of religions in a South African context is developed in the sixth and final chapter This scholarly book pays tribute to the academic contribution of P J van der Merwe mentor of the authors of these multifaceted reflections on theology of religions The target audience is specialists in the field of religion studies The distinctive contribution of the book is the innovative perspectives on the relationship between Islam and Christianity in both the Roman Catholic and Protestant contexts

Divine Violence and the Christus Victor Atonement Model Martyn J. Smith,2016-09-23 In this book Martyn Smith addresses the issue of God s violence and refuses to shy away from difficult and controversial conclusions Through his wide ranging and measured study he reflects upon God and violence in both biblical and theological contexts assessing the implications of divine violence for understanding and engaging with God s nature and character Jesus too through his dramatic actions in the temple is presented as one capable of exhibiting a surprising degree of violent behavior in the furtherance of God s purposes Through a reappropriation of the ancient Christus Victor model of atonement with its dramatic representation of God s war with the Satan Smith proposes that Christian understanding of both God and salvation has to return to its long neglected past in order to move forward both biblically and dynamically into the future **The Model of Everything** Ralph Brown,2021-01-06 When humanity questions the purpose of existence they often turn to science or religion for answers Unfortunately both science and religion contain inconsistencies These inconsistencies touch the human spirit in the most profound ways resulting in an uneasiness about life Do I really have a purpose Seeking to address the spiritual unease the history of humanity documents the development and pursuit of religion with a concept of a divine creator with a plan for humanity However in more recent history with an increasing emphasis on scientific knowledge the concept of a divine creator is increasingly discounted as inconsistent with the material world revealed by scientific discovery Via the scientific method humanity is turning its focus to the material world creating new gods of science and the purveyors of scientific knowledge But rather than provide definitive answers as science continues to advance the theories of creation point increasingly to inconclusive and inconsistent results These shortcomings of science are often veiled in the expression

Someday we will know but many in the scientific community are beginning to question that hope With science and religion each plagued with inconsistency perhaps appropriately integrating them will lead us to the real answers we seek The Model of Everything A Divine Universe relies on both scientific and biblical knowledge to fully integrate science and religion in a consistent complementary and interdependent fashion This confluence and synergy of knowledge reveal a comprehensive model that accounts for the totality of human existence the physical and spiritual The reader via personal and straightforward experiments participates in developing the model Biblical knowledge is the pointer for a unique application of scientific knowledge Then the incredible and sometimes bizarre world of science reveals how God teaches us about our existence and spirituality The integration of scientific and biblical knowledge results in several new mental constructs providing an account for the totality of creation the material and immaterial and a genuine hope and understanding of personal existence The model presents some eye popping implications and applications as well as predictions on future scientific progress and outcomes Each reader is invited and encouraged to become a scientist a scientist prepared to chart a life changing personal discovery

The Model of Love Vincent Brümmer,1993-09-16 Religious believers understand the meaning of their lives and of the world in terms of the way these are related to God The conceptual models whereby this relationship is described therefore play a key role in the conceptual designs which theologians produce to express the faith of the community of believers Vincent Brümmer examines the implications of using the model of love in this context and looks at a number of the most significant views of the nature of love exclusive attention Ortega y Gasset ecstatic union nuptial mysticism passionate suffering courtly love need love Plato Augustine and gift love Nygren All these views are shown to interpret love as an attitude rather than as a relation between persons In the final chapters a relational concept of love is developed and it is shown how all the various attitudes discussed in the previous chapters have a role to play Finally the implications are addressed of using the model of love as a key model in theology

The Superiority of an Evangelical Model of Religious Liberty Daniel J. Trippie, 2022-11-14 Religious liberty is America's first freedom But in recent years challenges to religious liberty have abounded For example some claim that religious freedom promotes intolerance and bigotry while others contend religious freedom condemns people to hell And others weaponize religious liberty for culture warring Nevertheless evangelicals believe that religious liberty is fundamentally a matter of human dignity thus religious liberty is a right we must preserve for all people This book will explore how evangelical anthropology cosmology and eschatology offer

the most stable basis for religious freedom Secular and Roman Catholic theories may positively contribute to religious liberty but the evangelical model is superior because it answers fundamental questions left unanswered in other models The Family a Religious Institution; Or Heaven Its Model. ... Erastus Hopkins,1840 The Colonizer's Model of the World J. M. Blaut,2012-07-23 This influential book challenges one of the most pervasive and powerful beliefs of our time that Europe rose to modernity and world dominance due to unique qualities of race environment culture mind or spirit and that progress for the rest of the world resulted from the diffusion of European civilization J M Blaut persuasively argues that this doctrine is not grounded in the facts of history and geography but in the ideology of colonialism Blaut traces the colonizer s model of the world from its 16th century origins to its present form in theories of economic development modernization and new world order
