What Makes America Great? Lon Cantor, 2003-06 Unlike dry history books *What Makes America Great* is written in a breezy personal style It makes history come alive with humanizing stories about the men and women who made America great Chapter 1 provides objective proof of America's greatness using a lot of statistics Chapters 2 and 3 cover the early history of America and explain why we revolted Chapter 4 explains our victory over England in the American Revolution a tremendous upset Few Americans know how the colonists achieved this astounding feat Some modern debunkers like to say that our founding fathers acted out of selfishness rather than principle Chapter 5 shows the idealism of our founders and details the sacrifices made by the signers of the Declaration of Independence Our founding fathers were faced with the exciting but daunting task of creating an entirely new kind of country Well educated men they based the United States on principles developed by the world's greatest philosophers Chapter 6 starts with Moses and goes through Locke and Voltaire Each philosopher's ideas are related to American ideals The Declaration and the Constitution are the two greatest publications mankind has ever known But they weren't created out of thin air Chapter 7 discusses the precedents our forefathers studied before drafting these two great documents In Chapter 8 each American war is discussed in the light of whether it was just or unjust Chapter 9 covers the role of immigrants in shaping America It shows the challenges obstacles and contribution of each immigrant group No country is perfect not even America Chapter 10 discusses the five areas in which America has done wrong Indians slaves women prejudice and education Chapter 11 is a glimpse into the future of America

, *What Makes an Artwork Great?* Michael H. Mitias, 2024-06-04 Michael Mitias presents explains and defends in some detail the features that make an artwork great magic universality and the test of time Although some aestheticians beginning with Longinus discussed these features during the past two millennia they did not analyze them comprehensively nor did they justify them from the standpoint of a satisfactory conception of the nature of art In this book the author first explains the nature of the features that make an artifact art and then proceeds to establish the validity of his thesis on firm epistemological and ontological foundations In his endeavor to explicate the nature of this foundation the author answers four questions First what is the genesis of the artwork What makes it art He answers this question by advancing a concept of

aesthetic depth The essence of this depth is human meaning Second under what perceptual conditions does this depth come to life in the process of aesthetic perception Third what is the role of the concept of aesthetic depth in the analysis of the nature of the great artwork How does the concept of aesthetic depth function as a principle of explanation Fourth how can we justify the attribution of magic universality and the test of time to the great work of art In short an understanding of the genesis of the artwork aesthetic depth aesthetic value and aesthetic perception is indispensable for an adequate conception of greatness in art

The It Factor: What Makes a Teacher Great? Holly J. Thornton, 2018-05-16 The impact a teacher has on students may be profound and lasting Thus teacher preparation is grounded in standards to assure that all teacher candidates know the content and have the skills needed to become good teachers What makes a teacher great The answer is not clear cut or easily measured with tests But we all know a great teacher when we see one The best teachers have an It Factor that sets them apart from others It is seemingly intangible and unteachable as it is often said that Some people are just born to be teachers This book challenges that assumption and uncovers the It Factor Teacher and student voices helped to develop language and tools to examine how teachers are disposed to think and act and how this affects student learning If we can identify what makes teachers great we can teach it Students have a sea of information opinions and messaging at their fingertips They find themselves navigating through a myriad of facts and alternative facts Opinions beliefs and fallacies share the same platform and status as well grounded information and vetted ideas fueling tensions among individuals and distance between groups Developing students who are caring critical thinkers and problem solvers may be more important now than ever The teachers who are right for this challenge have more than content knowledge and teaching skills To meet this challenge teachers need to have It that something inside that makes them not just good teachers but great ones
