Plasma Technology in the Preservation and Cleaning of Cultural Heritage Objects Radko Tiño, Katarína Vizárová, František Krčma, Milena Reháková, Viera Jančovičová, Zdenka Kozáková, 2021-03-30 Scientists have long been looking for alternative methods for the cleaning of historical and cultural museum objects as conventional methods often fail to completely remove surface films leaving contamination and surface residues behind Low temperature plasmas have recently been found to provide a new efficient and durable approach that maintains the safety of both the materials and personnel This book is the first to introduce the emerging use of low temperature plasmas in the cleaning and decontamination of cultural heritage items It provides a comprehensive exploration of the new possibilities of cleaning objects with plasma before providing a practice guide to the individual cleaning methods and an overview of the technologies and conditions used in the different cleaning regimes It is an ideal reference for researchers in plasma physics in addition to professionals working in the field of historical and cultural conservation Features Provides a thorough overview of the cleaning potential of emerging plasma technologies in accessible language for

professional restorers and conservators without a scientific background Includes the latest case studies from the field which have not been published elsewhere yet Authored by a team of experts in the field About the Authors Dr Radko Tio is an Associate Professor at the Slovak University of Technology in Bratislava Slovakia Dr Katarína Vizrová is an Associate Professor at the Slovak University of Technology in Bratislava Slovakia Dr František Krmaš is an Associate Professor at Brno University of Technology Czech Republic Dr Milena Rehková is an Associate Professor at the Slovak University of Technology in Bratislava Slovakia Dr Viera Janovičová is an Associate Professor at the Slovak University of Technology in Bratislava Slovakia Dr Zdenka Kozáková is an Associate Professor at Brno University of Technology Czech Republic **Innovation**

Africa Olugbenga Adesida, Geci Karuri-Sebina, João Resende-Santos, 2016-03-31 This book contains a number of case studies that examine the nature and origins of emerging high end innovation hubs in Africa It analyses highlights and draws lessons from some of the most promising and successful innovation cases in Africa today exploring the key factors driving their successful emergence growth and future prospects Chromic Materials Michal Vík, Aravin Prince Periyasamy, 2018-08-06 This informative volume reflects the state of art in the science of color changeable materials and provides an abundance of in depth knowledge about the field of colorimetry The book describes the facts behind the chromic phenomena from the point of application spectrophotometry of chromic materials and instrumentation and testing The authors begin with a short historical overview of the chromic phenomena chromic materials and classification of chromic materials and then go on to provide comprehensive treatises on chromic or color changeable textiles and production techniques Detailed descriptions of measurement methods that are usable in cases of translucent or opaque materials are provided as well A number of new concepts are discussed along with standardized CIE International Commission on Illumination colorimetry with various CIE color space systems Chromic materials appear as a dynamic system which allows for a wide range of potential applications and related research The authors share their own experiences with measurement of color chromic materials with the view to help fill the huge gap in field of measurement from the point of view in standardization The authors conclude with an in depth study of the testing of chromic testing including testing for color fastness fatigue resistance light fastness wash fastness and rubbing fastness **Cretaceous Climate Events and Short-Term Sea-Level Changes** M. Wagreich, M.B. Hart, B. Sames, I.O. Yilmaz, 2020 Sea level constitutes a critical planetary boundary for geological processes and human life Sea level fluctuations during major greenhouse phases are still enigmatic and strongly discussed in terms of changing climate systems The geological record of the Cretaceous greenhouse period provides a deep time view on greenhouse phase Earthsystem processes that facilitates a much better understanding of the causes and consequences of global geologically short term sea level changes In particular Cretaceous hothouse periods can serve as a laboratory to better understand a near future greenhouse Earth This volume presents high resolution sea level records from globally distributed sedimentary archives of the Cretaceous involving a large group of scientists from the International Geoscience Programme IGCP 609

Marine to non marine sedimentary successions were analysed for revised age constraints the correlation of global palaeoclimate shifts and sea level changes tested for climate driven cyclicities and correlated within a high resolution stratigraphic framework of the Geological Timescale For hothouse periods the hypothesis of significant global groundwater related sea level change i e aquifer eustasy as a major process is reviewed and substantiated [A scholarly inquiry into disciplinary practices in educational institutions](#) Connie B. Glazer,2017-10-03 This book illustrates how mine seismology can be used to improve underground safety standards It describes several preventive actions that have been put into practice at the 5B Area of No 5 Shaft Vaal Reefs gold mine after issuing seismic warnings These included additional safety pillars changes in mining sequences and directions and a review of the mining strategy for the entire 5B area The presented experiment with seismic warning concept was a success because it was an internal mine project Further the Vaal Reefs management adopted the philosophy that the success rate should be measured in the preventive actions taken not in the success of the prediction itself Reviewing these and other aspects the book clearly demonstrates how mine seismology can effectively improve underground safety standards Stefan Glazer s book addresses in a very comprehensive manner both technical and practical problems of implementing and then effectively using microseismic networks and data Stefan proves that through comprehensive microseismic data analysis the location of potential rock burst can be assessed and then

prevention action plans can be developed providing more confidence to management and workers that deposits can be mined safely Michal Stawski VP Strategic Geomechanical Specialist PT Freeport Indonesia I began reading this story expecting to find a technical review of the science of seismology and its application in mining but this book is much more than that This is a must read for those managing seismically active mines and should provide a wake up call to the industry as the complexity surrounding the management of seismic risk needs to be clarified in order for this to advance Eric Strom Director Underground Mining New Gold Inc As a mining geotechnical practitioner having experience in large open pit and underground massive mining operations I have learned that mining induced seismicity can have a significant impact on the safety and economics of operations However seismicity is a complex field that is generally left to specialists with little input from geotechnical engineers and engineering geologists This is a must read for mine seismologists geotechnical practitioners and mining engineers alike and will be a welcome and much needed addition to my own book cabinet This will be an invaluable work as our industry progresses to the mining of new depths in both the underground and open pit environments Desmond Mossop Pr Sci Nat Principal Engineering Geologist SRK Consulting

Mine Seismology: Seismic Response to the Caving Process S.N. Glazer, 2018-08-01 This book presents the results of seismic data analysis and interpretation based on nearly one million seismic events This seismicity was induced by the caving process in four copper mines each located on a different continent The book not only serves as an interpretation guide it also illustrates the benefits of evaluating data from different mines How to establish which seismic data base is faulty and why The formation of a universal seismic response to the caving process Indisputable evidence that hydro fracturing improves underground safety This book invites discussion on more general aspects of research such as Basic research applied research and implementation Predicting mine induced seismic events Quantitative versus qualitative seismology Research versus pseudo research What is genuine research In the Parlabora Mine Stefan has demonstrated that the use of the seismic system was a very practical means of monitoring the progression of the cave up to and beyond break through into the open pit above The seismic system was vital in drawing up the undercutting and seismic protocols and determining the maximum potential seismic hazard level Peter Townsend Retired Mine Manager and Consultant I consider Stefan the pioneer of using microseismic data to provide understanding of the mechanism and progress of cave mining Science has advanced considerably since the use of less than reliable extensometers to monitor the cave back position and Stefan was leading this advance This book provides a lot of useful insights in how we can best understand the data that we gather and how to change this data into useful information Neil Hepworth C Eng MIMMM Geomin Consultorio Brazil Consultant Mining and Geotechnics Stefan mine seismology trilogy is a comprehensive tutoring on how to analyse and interpret mine induced seismicity This coaching is based on multiple practical examples presented from the problem to be solved with input data tests followed by analysis and interpretation This last is presented with many details that explain the whole process Mahdi Bayuargo ST MAScPT Duaem Gada Bayuagus
