Resources in Education, 1999-10 *Experience of School Transitions* Stephen Billett, Greer Johnson, Sue Thomas, Cheryl Sim, Stephen Hay, Jill Ryan, 2012-06-22 Leaving school whether to move on to training work or education is a fundamental rite of passage the world over This volume draws on a wealth of international sources and studies in its analysis of the transitions young students make as they move on from their secondary schooling It identifies how these transitions are planned for by policymakers enacted by school staff and engaged with by students themselves With data from a range of nations with advanced industrial economies the book delineates how the policies relating to these transitions need to be conceived and implemented how the transitions themselves are negotiated by young people and how they might be shaped to meet the varied needs of the students they are designed to help The authors argue that the relationship often complex between what schools provide in the way of preparation and the ways in which students take up what is on offer is the crucial nexus for understanding the experience of transitions by young people and for enhancing that experience With a host of case studies of transition policies themselves as well as evaluative data on how they were received by the school leavers whom they were designed for this valuable addition to the educational literature deserves to be read by all those with roles in preparing the young for their journey into a complex adult world full of pitfalls as well as opportunity **Catalog of Copyright Entries.
