Go Green Get Lean Kate Geagan,2009-03-17 Over the past 20 years America has been steadily marching toward a diet that is more drenched in fossil fuel than any key nutrient Experts estimate that it now takes roughly 7 to 10 calories of fossil fuel energy to bring one calorie of food energy to the American plate Not only have our eating habits turned us into an increasingly overweight society but the alarming truth is that our food choices are having as much of an impact on the planet as the cars we drive Go Green Get Lean is the perfect eating plan for our time Revealing easy to follow steps anyone can take to eat for a healthy body and planet and drop up to 9 pounds in the first 2 weeks Kate Geagan helps readers see the questionable value of convenience foods and explains why going green doesn't require a drastic vegan overhaul Because there are many nutritional benefits to be drawn from some non plant based food choices she points readers to the best selections including occasional splurges they can enjoy in good conscience In learning to make truly LEAN choices Kate offers the following straightforward formula Before eating food ask yourself Local or global What was the Energy used to bring it to my plate Include processing packaging transportation and temperature of food Animal or plant Plant foods are greener Is this Necessary Is this food critical to my health and weight goals This trailblazing work the first to offer a specific weight loss plan along with the promise of a lowered carbon footprint makes it possible for readers to help the environment and their waistlines at the same time **Transparency in International Trade and Investment Dispute Settlement**

Junji Nakagawa,2012-12-12 An increasing number of international trade disputes are settled through the WTO dispute settlement DS procedure In parallel an increasing number of international investment disputes are settled through investor host state arbitration procedure What does transparency mean in the context of international trade and investment dispute settlement Why is enhanced transparency demanded To what extent and in what manner should these dispute settlement procedures be transparent The book addresses these issues of securing transparency in international trade and investment dispute settlement Transparency in international trade and investment dispute settlement drew attention of international economic law scholars in the late 1990s but most literature discusses the transparency in trade DS and investment DS separately The book deals with the issue in a comprehensive and coherent manner combining the analyses of the issue in

both DS procedures and comparing the pros and cons to enhanced transparency in them The main argument of the book is first that transparency in these procedures should be enhanced so that they may be accountable to a wider range of stakeholders but secondly that the extent and the manner of transparency might differ in these two procedures reflecting their structural and functional differences The book will appeal to both scholars and students interested in international economic law and international relations as well as lawyers and government officials who deal with international trade and investment regulation

A Sustainable Bioeconomy Mika Sillanpää, Chaker Ncibi, 2017-04-13 An authoritative and comprehensive volume of knowledge and green technologies wholly focused on the future of the bioeconomy The authors present data show opportunities discuss R D findings analyze strategies assess the wider economic impact showcase achievements criticize policies and propose solutions for the green revolution in biofuels biochemicals and biomaterials production and power generation A fascinating range of case studies from the US China and many European countries are used to inform readers about the impact of this field on society and how various technologies are currently being implemented Additionally the role of industry on this green industrial revolution is outlined with contributions from several major companies such as DuPont US UPM Kymmene Oy Finland Anhui BBKA Biochemical Co China
