The Living Elements of Healthy Building Design Janus Welton Aia Bbei Architect, 2007-06-14. Based on 15 years of wide-ranging study, *THE LIVING ELEMENTS OF HEALTHY BUILDING DESIGN* is the first in a series of guidebooks that accompany workshops of the same name to educate and clarify the impact of current building practices and materials on the indoor environment and human health in a form accessible to laypersons and professionals alike, from homeowner to non-technical designer. To simplify and substantiate this wealth of information, the author organizes the material through the lens of the Living Elements: Earth, Metal, Water, Wood, Air, and Fire, emphasizing the interrelationship between human life, the earth, and the cosmos. This reference and its companion volumes, soon to be published, support the concept of Conscious Architecture, an innovative and integrated model of architecture and design that inspires harmonious structures where natural elements purposefully intermingle with form, color, light, and sound to create holistic and healthy buildings that contain and reflect the wholeness of nature and its expression in the human spirit.

Religion, Heritage and the Sustainable City Yamini Narayanan, 2014-10-10. The speed and scale of urbanisation in India is unprecedented almost anywhere in the world and has tremendous global implications. The religious influence on the urban experience has resonances for all aspects of urban sustainability in India, and yet it remains a blind spot while articulating sustainable urban policy. This book explores the historical and ongoing influence of religion on urban planning, design, space utilisation, urban identities, and communities. It argues that the conceptual and empirical approaches to planning sustainable cities in India need to be developed out of analytical concepts that define local sense of place and identity. Examining how Hindu religious heritage, beliefs, and religiously influenced planning practices have impacted sustainable urbanisation development in Jaipur and Indian cities in general, the book identifies the challenges and opportunities that ritualistic and belief resources pose for sustainability. It focuses on three key aspects: spatial segregation and ghettoisation, gender-inclusive urban development, and the nexus

between religion nature and urban development This cutting edge book is one of the first case studies linking Hindu religion heritage urban development women and the environment in a way that responds to the realities of Indian cities It opens up discussion on the nexus of religion and development drawing out insightful policy implications for the sustainable urban planning of many cities in India and elsewhere in South Asia and the developing world Home Alison Blunt, Robyn Dowling, 2022-05-30 Home articulates a critical geography of home in which home is understood as an emotive place and spatial imaginary that encompasses lived experiences of everyday domestic life alongside a wider and often contested sense of being and belonging in the world Engaging with the burgeoning cross disciplinary interest in home since the first edition was published this significantly revised and updated second edition contains new research boxes illustrations and contemporary examples throughout It also adds a new chapter on Home and the City that extends the scalar understanding of home to the urban The book develops the conceptual and methodological underpinnings of a critical geography of home drawing on key feminist postcolonial and housing thinkers as well as contemporary methodological currents in non representational thinking and performance The book s chapters consider the making and unmaking of home across the domestic scale house as home the urban city as home national nation as home and homemaking in relation to transnational migration and diaspora Each chapter includes illustrative examples from diverse geographical contexts and historical time periods Chapters also address some of the key cross cutting dimensions of home across these scales including digital connectivity art and performance more than human constructions of home and violence and dispossession The book ends with a research agenda for home in a world of COVID 19 The book provides an understanding of home that has three intersecting dimensions that material and imaginative geographies of home are closely intertwined that home power and identity are intimately linked and that geographies of home are multi scalar This framework the examples used to illustrate it and the intended audience of academics and students across the humanities and social sciences will together shape the field of home studies into the future Forthcoming Books Rose Arny, 2003 Art India , 2007 **EDRA40** Environmental Design Research Association.
