Financial Accounting - Class 11 - English Navneet Singh, Accounting is a vital aspect of business that involves recording, summarizing, analysing and communicating financial information. It provides a systematic way to track the financial activities of an organization, enabling stakeholders to make informed decisions. Here's an introduction to the fundamental concepts and principles of accounting.

Purpose of Accounting The primary purpose of accounting is to provide relevant financial information about a business entity to internal and external users. Internal users include management and employees who use this information for decision-making, planning and controlling operations.

External users include investors creditors government agencies and the public who rely on financial statements to evaluate the financial health and performance of the business

Key Financial Statements

Balance Sheet It provides a snapshot of the company's financial position at a specific point in time showing its assets liabilities and equity

Income Statement Also known as the profit and loss statement it summarizes the revenues expenses and net income or loss of a company over a specified period

Statement of Cash Flows This statement reports the cash inflows and outflows from operating investing and financing activities providing insights into how cash is generated and used by the business

Accounting Principles GAAP Generally Accepted Accounting Principles These are a set of standard accounting principles standards and procedures that companies use to compile their financial statements in the United States It ensures consistency comparability and transparency in financial reporting

IFRS International Financial Reporting Standards These are accounting standards issued by the International Accounting Standards Board IASB used by companies in many countries outside the United States IFRS aims to harmonize accounting practices globally

Double Entry Accounting This is a fundamental accounting principle that states that for every transaction there are at least two accounts involved with one account debited and another credited This ensures that the accounting equation $\text{Assets} = \text{Liabilities} + \text{Equity}$ remains balanced

Types of Accounts

Assets Economic resources owned or controlled by the company such as cash inventory property and equipment

Liabilities Obligations owed by the company to external parties such as loans accounts payable and bonds payable

Equity Represents the residual interest in the assets of the company after deducting liabilities It includes contributed capital from owners and retained earnings

Revenues Income generated from the sale of goods or services

Expenses Costs incurred in the process of generating revenue

Accounting Cycle This is the process that accountants follow to record analyse and report financial transactions of a business It typically includes steps such as identifying transactions journalizing posting to ledgers preparing trial balances adjusting entries preparing financial statements and closing entries

Auditing This is the examination of financial statements and accounting records by an independent auditor to ensure their accuracy and compliance with accounting standards and regulations
