

2. Draw the following forces as vectors on the Cartesian plane:

1. $F_1 = 3 \text{ N}$ in the positive x-direction
2. $F_2 = 1 \text{ N}$ in the negative x-direction
3. $F_3 = 3 \text{ N}$ in the positive y-direction

Solution:

We choose a scale of **1 N:1 cm**. Now we sketch the vectors on the Cartesian

plane (we can place the vectors anywhere on the Cartesian plane):

QUESTION 2 (Start on a new page.)

Two forces, of magnitudes 50 N and 80 N, act at a point on a Cartesian plane in the directions shown in the sketch below.

2.1 Give the correct term for the following description:

A single vector having the same effect as two or more vectors together (1)

2.2 Calculate the:

2.2.1 Magnitude of the vertical component of the 50 N (2)

2.2.2 Magnitude of the resultant (net) force (5)

2.2.3 Direction of the resultant (net) force (2)
[10]

QUESTION 3 (Start on a new page.)

A box, with a mass of 45 kg, is pulled with a force of 90 N at an angle of 50° to the horizontal. The box moves at a **CONSTANT VELOCITY**.

Physics Handbook & Study Guide Grade 11-12 IEB Kevin Smith, 2024-02-01 A comprehensive summary of Grade 11 12 Physics Simple logical summaries with example exam questions and work through solutions The book covers the fundamentals of Grade 11 12 Physics and complements the material in any class text **Paper** ,1964 **Research in Education** ,1971 *Federal Government Publications Selected for High School Libraries* Canada. Information Canada, 1973 Resources in Education ,2000-04 *Exceptionally Gifted Children* Miraca U. M. Gross, 2003-12-16 Exceptionally Gifted Children is unique The first edition of this book published in 1993 introduced 15 remarkable children some of the most gifted young people ever studied and traced their path through school exploring their academic achievements and in some cases enforced underachievement their emotional development their social relationships and their family relationships and upbringing This new edition reviews these early years but also follows the young people over the subsequent ten years into adulthood No previous study has traced so closely and so sensitively the intellectual social and emotional development of highly gifted young people This 20 year study reveals the ongoing negative academic and social effects of prolonged underachievement and social isolation imposed on gifted children by inappropriate curriculum and class placement and shows clearly the long lasting benefits of thoughtfully planned individual educational programs The young adults of this study speak out and show how what happened in school has influenced and still influences many aspects of their lives Miraca Gross provides a clear practical blueprint for teachers and parents who recognise the special learning needs of gifted children and seek to respond effectively Changing Schools, Changing Practices Dr. Manfred Lang (Dipl.-Psychologe), 1999 Making it tangible. Learning outcomes in science education Sascha Bernholt, Knut Neumann, Peter Nentwig, 2012 One of the central features in current educational reforms is a focus on learning outcomes Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn More recently the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible This book is the result of a symposium held in Kiel that was arranged by two science education groups one at the IPN Leibniz Institute for Science and Mathematics Education at the University of Kiel in Germany and the other at the University of York UK The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes The aim was to clarify central conceptions and approaches for a better understanding among the international science education community The book is divided into five parts In Part A the organizers set the scene describing the rationale for arranging the symposium Part B provides a broad overview about different approaches challenges and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes The set of papers in Part C provides deep insights into different although comparable approaches which aim to frame to assess and to promote learning and learning outcomes in science education Smaller projects are presented as well as broad coordinated national

programs The papers in Part D outline the individual historical development from different national perspectives reflecting the deficits and problems that led to current reforms Finally a summary of the organizers analyses the conclusions from different vantage points

Casebook in Nursing Education Vivian Wood, University of Western Ontario. Faculty of Nursing, 1972 Global Perspective on Issues and Trends in Educational Translanguaging Bautista, Jude Cañero, Kim, Jean, 2025-05-29 The growing superdiversity around the world now appears to be the norm In traditional English speaking inner circle nations it is becoming increasingly rare to find classrooms with students who come from monocultural and monolingual backgrounds However teaching practices remain based on Anglocentric standards and perspectives even when most of the English speakers in the world are no longer just the monolingual speakers of the language Research in bilingualism and multilingualism reverberate the potential of translanguaging as a pedagogical practice This is to leverage all the linguistic cultural and semiotic resources of learners so that they can actively engage in the language literacy and content area learning processes in the classroom However even though it has gained ground in theory and research it has not been upheld in instructional practice especially in the Anglophone nations While some regions view translanguaging as a pathway to educational justice others face barriers such as limited resources administrative constraints or lack of teacher training Despite its promise concerns remain around the selective use of languages and the risk of reinforcing existing

linguistic hierarchies Global Perspective on Issues and Trends in Educational Translanguaging explores translanguaging pedagogies from both monolingual English speaking contexts and multilingual and multicultural contexts It examines a monolingual multilingual pairing of theoretical research and practical perspectives from around the world assessing how translanguaging pedagogies are practiced and researched worldwide This book covers topics such as indigenous studies migrant learners and pedagogy and is a useful resource for educators language experts academicians researchers and scientists

Using Analogies in Middle and Secondary Science Classrooms Allan G. Harrison, Richard K. Coll, 2008
 Makes a distinct contribution to science instruction Many teachers attempt to use analogies and metaphors to introduce abstract concepts however little is available on how to do this with specific examples The authors definitely address a need Douglas Llewellyn Professor of Science Education St John Fisher College Helps preservice and novice teachers use analogies and allows teachers to bridge the gap that sometimes occurs when students are learning abstract concepts The examples cover a wide variety of subjects and are written in a concise easy to understand voice John D Ophus Assistant Professor of Science Education University of Northern Iowa Use the power of analogies to enliven your science classroom and meet national standards When analogies are effective they readily engage students interest and clarify difficult and abstract ideas But not all analogies are created equal and developing them is not always intuitive Drawing from an extensive research base on the use of analogies in the classroom Allan Harrison Richard Coll and a team of science experts come to the rescue with more than 40 teacher friendly ready to use analogies for biology earth and space studies chemistry and physics The authors show teachers how and when to select analogies for instruction why certain analogies work or break down how to gauge their effectiveness and how to improve them Designed to enhance teachers presentation and interpretation of analogies through focus action and reflection FAR this guidebook includes Key science concepts explained through effective models and analogies Research findings on the use of analogies and their motivational impact Guidelines that allow teachers and students to develop their own analogies Numerous visual aids science vignettes and anecdotes to support the use of analogies Linked to NSTA standards Using Analogies in Middle Secondary Science Classrooms will become a much used text by teachers who want to enrich inquiry based science instruction
