Identity Construction and Illness Narratives in Persons with Disabilities Charlotte Glintborg, Manuel L. de la Mata, 2020-08-31 This book investigates how being diagnosed with various disabilities impacts on identity Once diagnosed with a disability there is a risk that this label can become the primary status both for the person diagnosed as well as for their family This reification of the diagnosis can be oppressive because it subjugates humanity in such a way that everything a person does can be interpreted as linked to their disability Drawing on narrative approaches to identity in psychology and social sciences the bio psycho social model and a holistic approach to disabilities the chapters in this book understand disability as constructed in discourse as negotiated among speaking subjects in social contexts and as emergent By doing so they amplify voices that may have otherwise remained silent and use storytelling as a way of communicating the participants' realities to provide a more in depth understanding of their point of view This book will be of interest to all scholars and students of disability studies sociology medical humanities disability research methods narrative theory and rehabilitation studies

Conquer Chronic Pain Peter Przekop, 2015-10-13 Dr Przekop provides a revolutionary alternative program proven effective in

managing chronic pain By learning how the brain can be reprogrammed to reverse patterns you can often completely relieve suffering and the deep despair chronic pain can cause The incidence of chronic pain has taken on epidemic proportions The common response of traditional medicine has been to prescribe opioid painkillers which can lead to overdose and addiction Over the past ten years Dr Peter Przekop has developed a revolutionary alternative program to manage pain that goes well beyond the short term relief of prescription painkillers Przekop discovered that pain can become chronic not just because of the trauma that caused it but because the brain becomes programmed to recreate the experience of pain as a coping mechanism Conquer Chronic Pain will help you return to pain free functioning Gain the same insights Dr Przekop has brought to hundreds of chronic pain sufferers by learning how the brain can be reprogrammed to alleviate pain You ll also learn how chronic stress adversity and negative emotions influence how we experience and interpret pain and what to do to reverse the pattern Dr Przekop provides a daily routine of exercises that have proven effective in managing chronic pain often completely relieving it and the deep despair it can cause Following his program brings the mind and body into harmony so that the psychological function that chronic pain previously served is no longer necessary *Discursive Remembering* Lucas M. Bietti, 2014-10-14 This book aims at building a bridge between the social and political aspects of remembering and the cognitive and discourse processes driving such activities By analyzing these cognitive and discursive processes Bietti explores practices of individual and collective remembering in institutional and private settings in relation to periods of political violence in Argentina This books begins to fill the conceptual gap between cognitive oriented approaches to remembering that draw conclusions about how memory functions in the mind without a detailed discourse analysis of the communicative interaction in which this process unfolds and the discourse and pragmatic oriented approaches that are mainly interested in analyzing the rhetorical features of conversational remembering in some cases disregarding that there are underlying cognitive mechanisms that drive the construction of discourses about past experiences The empirical analysis shows that individual and collective remembering in relation to periods of political violence in Argentina vary in pragmatic ways due to the fact that these accounts of the past were constructed with reference to the communicative situation Thus this book also aims at shedding new light on the current practices of commemoration and remembrance related to periods of political violence in Argentina in public and private settings Beyond Narrative Coherence Matti Hyvärinen, 2010 Beyond Narrative Coherence reconsiders the way we understand and work with narratives Even though narrators tend to strive for coherence they also add complexity challenge canonical scripts and survey lives by telling highly perplexing and contradictory stories Many narratives remain incomplete ambiguous and contradictory Obvious coherence cannot be the sole moral standard the only perspective of reading or the criterion for selecting and discarding research material Beyond Narrative Coherence addresses the limits and aspects of narrative dis coherence by offering a rich theoretical and historical background to the debate Limits of narrative coherence are discussed from the perspective of three fields of life that often

threaten the coherence of narrative illness arts and traumatic political experience The authors of the book cover a wide range of disciplines such as psychology sociology arts studies political science and philosophy *The Sense of Mission in Russian Foreign Policy* Alicja Curanović, 2021-03-04 This book explores how far messianism the conviction that Russia has a special historical destiny is present in and affects Russian foreign policy Based on extensive original research including analysis of public statements policy documents and opinion polls the book argues that a sense of mission is present in Russian foreign policy that it is very similar in its nature to thinking about Russia's mission in Tsarist times that the sense of mission matters more for Russia's elites than for Russia's masses and that Russia's special mission is emphasised more when there are questions about the regime's legitimacy as well as great power status Overall the book demonstrates that a sense of mission is an important factor in Russian foreign policy

Crossroads of the Classroom Vicki Ross, Elaine Chan, Dixie K. Keyes, 2017-04-28 This book aims to explore and make visible the intersection of subject matter knowledge and teacher knowledge in the narratives of teachers This complicated interaction between these two bodies of knowledge is often studied and little understood

Trapped by History Darryl Cronin, 2021-04-15 The Australian nation has reached an impasse in Indigenous policy and practice and fresh strategies and perspectives are required Trapped by History highlights a fundamental issue that the Australian nation must confront to develop a genuine relationship with Indigenous Australians The existing relationship between Indigenous people and the Australian state was constructed on the myth of an empty land terra nullius Interactions with Indigenous people have been constrained by eighteenth century assumptions and beliefs that Indigenous people did not have organised societies had neither land ownership nor a recognisable form of sovereignty and that they were savage but could be civilized through the erasure of their culture These incorrect assumptions and beliefs are the foundation of the legal constitutional and political treatment of Indigenous Australians over the course of the country's history They remain ingrained in governmental institutions Indigenous policy making judicial decision making and contemporary public attitudes about Indigenous people Trapped by History shines new light upon historical and contemporary examples where Indigenous people have attempted to engage and dialogue with state and federal governments These governments have responded by trying to suppress and discredit Indigenous rights culture and identities and impose assimilationist policies In doing so they have rejected or ignored Indigenous attempts at dialogue and partnership Other settler countries such as New Zealand Canada and the United States of America have all negotiated treaties with Indigenous people and have developed constitutional ways of engaging cross culturally In Australia the limited recognition that Indigenous people have achieved to date shows that the state is unable to resolve long standing issues with Indigenous people Movement beyond the current colonial relationship with Indigenous Australians requires a genuine dialogue to not only examine the legal and intellectual framework that constrains Indigenous recognition but to create new foundations for a renewed relationship based on intercultural negotiation mutual respect sharing and mutual responsibility

This must involve building a shared understanding around addressing past injustices and creating a shared vision for how Indigenous people and other Australians will associate politically in the future

Forget Me Not: The Neuroethical Case Against Memory Manipulation Peter A. DePergola II, 2018-02-12 The first philosophical monograph on the ethics of memory manipulation MM Forget Me Not The Neuroethical Case Against Memory Manipulation contends that any attempt to directly and intentionally erase episodic memories poses a grave threat to the human condition that cannot be justified within a normative moral calculus Grounding its thesis in four evidential effects namely i MM disintegrates autobiographical memory ii the disintegration of autobiographical memory degenerates emotional rationality iii the degeneration of emotional rationality decays narrative identity and iv the decay of narrative identity disables one to seek identify and act on the good DePergola argues that MM cannot be justified as a morally licit practice insofar as it disables one to seek identify and act on the good A landmark achievement in the field of neuroethics this book is a welcome addition to both the scholarly and professional community in philosophical and clinical bioethics
