Future of the Word Chris Goodall, 2011-03-01 The average young adult in the US reads for about 7 minutes a day and the figure isn't much higher in Britain The last few decades have seen striking and nearly continuous falls in the amount of time individuals spend with books and other printed material And perhaps as a result the average level of literacy in the British and US populations is declining our ability to comprehend complex writing long words or sophisticated expressions is less than it was a few decades ago Very surprisingly the rate of decline is fastest amongst the best educated segment of the population Chris Goodall's readable and comprehensive book asks why this is happening In an ever more demanding world he inquires why is our ability to understand and use the written word in gradual but apparently relentless retreat Chris Goodall's *The Future of the Word* Technology culture and the slow erosion of literacy examines the striking but largely unnoticed evidence from around the world Using the latest research results from neuroscientists from academics who work on reading skills and from cultural analysts Goodall brings his commitment to scrupulous research to demonstrate how modern society is making it almost impossible for people to engage in deep reading Not only are people reading less but they now consume the written word in a more cursory and less reflective way The author has lost control of the reader we all tend to skip across the page searching exclusively for what is relevant to us rather than trying to understand the writer's point of

view or memorise her arguments There is a strong tendency to say that this doesn't matter We no longer need to read and to learn because all the information that we could possibly need is instantaneously available to us through electronic gadgets The argument of Goodall's book is that this complacency is mistaken Reading deeply helps us develop a framework and an intellectual structure to which we can add new ideas or opinions The internet gives us orphaned facts but the reading of books or long articles gives us understanding As importantly deep reading trains our brains to cope with complex ideas much as an athlete trains his muscles with repeated exercise Goodall discusses the convincing scientific evidence that truly proficient literacy a skill which is in sharp decline helps improve other cognitive capabilities and may even improve IQ If we don't go to the literacy gym often enough he says our intellectual capabilities suffer Chris Goodall is a well known writer on climate change and energy winning awards for his previous books and he is a regular commentator on scientific issues in newspapers in the UK and abroad In an earlier part of his career he worked in television and other mass media This book comes out of his fascination with how electronic technologies are affecting the way we think and live Although the digital revolution has made life easier and has improved many of our cognitive skills he says it is reversing our ability to read and to comprehend complex ideas Full of engaging reports of cutting edge science surprising and informative analysis and written with clarity and pace Chris Goodall's *The Future of the Word* is the first attempt to bring rigour to questions that many of us worry about it why do we find it more difficult to concentrate on the written word And what can we do about it **A**

The Human Environment Valentin Matcas, 2017-04-20 You are born in this world believing everything to be accurate reliable and unique just as you learn in school and then as you grow up this world shows itself in its true meaning Parents have secrets at home and politicians lie and cheat throughout the media while these might be the first inconsistencies that you notice in your perfect world The rich become richer not exactly through their true abilities but through their lies and illegalities and this might be the first injustice that you ever notice in this world Authorities replace authorities endlessly only to do the same this harms you throughout life while authorities never admit it yet you can see it well everybody knows it and this is your true actual environment But can you pinpoint exactly what goes on in this world and what goes wrong in your environment Because lies inconsistencies and illegalities are everywhere and there is nothing significant enough offering you an accurate point of reference an accurate perspective defining this altering environment helping you understand this world as it is Because the knowledge found at the base of your understanding of this world is missing as it is erroneous or it is misleading on purpose since this is how authorities strive to offer it to you This alters your reasoning now and consequently it alters your inner outer and social behavior Coincidentally your entire behavior is altered in this manner determining you now to be part of these lies and illegalities yourself directly or implicitly determining you to create in this manner on your own this Consensual Matrix found all around affecting and harming everybody just as everybody's altered behavior creates the same Consensual Matrix affecting you and the entire world Because the rich and the politicians never force you in any manner but they only expect and accept your behavior to fall in this exact consensual pattern coincidentally having all favorable outcomes turn in their favor Because this enforced consensual environment that you create through your consensual behavior might be unfavorable and harmful to you and to those around but it is certainly profitable for those controlling this world Because you must consider all environments when you study this world as your natural consensual constructed social inner cognitive informational higher and spiritual human

environments forming your actual world This defines your surroundings it patterns your behavior and it gives meanings to your existence it gives you a place and role in society and it challenges your existence it constrains you to act and develop to help and harm those around it is there when you are born and it always kills you in the end And if you fail understanding your real and consensual environments for what they truly are you end up missing a significant part of your existence of what life truly represents to you and to everyone around of what you should have always experienced and of what you should have always been Throughout this book we study the human environment in its entirety natural social cognitive spiritual and consensual since only through an accurate research of your entire environment you may find the accurate knowledge helping you structure and define your meaning and place in life and in this world **The Valley Farmer** ,1860 Intelligence - Theories and Applications Rainer M. Aslam

Mirza,2018-04-04 Project implementation aligned with strategic advancement is a challenging endeavor particularly in an environment of increasing complexity and productivity issues Your prime issue is to plan for right action in right time in right manner and for the right purpose Your attention determines the experience you end up with and the experience determines the outcomes you have reached Therefore you must control your attention to control arriving at your desired outcomes William James in his book The Principles of Psychology Vol I 1890 wrote a simple statement My experience is what I agree to attend to The statement is highly relevant even in the 21st century for managing high productivity through attention management This third volume provides areas for attention management and focuses on diversity team building meaningfulness and growing to leadership all of which are essentially required for maximizing and cultivating the real benefits with application of project management approach in business and industry

The Human Development Valentin Matcas,2016-04-20 What is more significant to develop in life your mind or your body Both are nice to privilege maintain and develop since they are both important And if this is the case then why do you see people taking care only of their bodies Why are you always more desirable in society through your bodily appearance and through your social influence than through your intelligence creativity and other cognitive abilities Why can you not find in the media entertainment and in society people engaged in a continuous development but remaining preoccupied with addictions bodily needs continuous servitude and social competition And now if you had the chance to develop as intensely as you could what exactly would you enhance the most Because throughout life people neglect to develop important aspects related to their mind and bodies while privileging other activities instead only because these happen to render them happier more popular and therefore more successful in a stereotypical manner But how exactly do you know how to develop How can you even tell what is pertinent to do in life You already know all the legal moral social and religious beliefs and tendencies of what to do and how to behave and develop but you cannot even follow them or not entirely since you have other things to do as everybody else And now by engaging in all addictions entertainment and other irrelevant activities you take away from your own development and fulfillment If you can even identify your own meaning and fulfillment in life besides what you see around What can you do Reason at the third intelligent human level through the extraordinary human mind if you can ever understand the human mind in the first place Because all knowledge provided to you consensually by the current science stands at the first servitude ideological level while all physiological tendencies coming from the human body are at the second animal level remaining incompatible You may still reason and develop through your human mind yet you have to be able to identify and remove all irrelevant and harmful beliefs stereotypes and entire ideologies in order to be able to reason accurately We notice now a discrepancy between people s meaningful adequate development and the consensual behavior demanded by others and meant for servitude indoctrination and social acceptance coming for stereotypical purposes However can you even define the adequate the meaningful and the proper human development and how this should take place You can always trace it if

you can ever identify the actual accurate human meaning in life and in this world This book studies the human development at cognitive social higher and physical levels in order to help you learn how to develop your mind body and intelligences along with all their cognitive abilities This study is done from objective cognitive and behavioral perspectives at the levels of your mind body higher self and much more **Dog Smart** Jennifer S.
