What Is Diagnosis?

- **The on-board diagnostic system is the vehicle's self-diagnosis function that is provided by the ECU (Electronic Control Unit).**
- **Upon receiving the signals from the sensors that detect the conditions of the vehicle, the ECU transmits signals to the actuators optimally for the current conditions.**
- **The ECU receives signals from the sensors in the form of voltage.**
- **The ECU can determine the conditions of the system by detecting the changes in the voltage of the signals that are output by the sensors.**
- **Thus, the ECU constantly monitors the input signals**
